Introduction

This report describes what the Internal Revenue Service did in 1975 and how it did it. It also describes what you, the taxpayer, did and how well you met your responsibilities. Fiscal Year 1975 was a period of particular stress for the Service, and in this period Congress began its intensive interest in IRS oversight. I testified eighteen times before various congressional committees during FY 1975. Out of this stress, this self-examination and this heightened congressional activity will come a more responsive and responsible system of tax administration.

In 1975 the Service collected nearly \$294 billion in Federal taxes. The 1975 filing period was highly successful from the standpoint of the IRS and taxpayers as more and better returns were filed earlier than ever before. Anticipating taxpayers' need for a prompt refund, the Service responded by processing returns faster than ever before.

The Tax Reduction Act of 1975, passed by the Congress midway through the filing period, called for a rebate of a portion of individual taxpayers' 1974 tax liability. This rebate program made unprecedented demands upon us, both in data processing and taxpayer service. The record shows how we responded to this challenge.

The real credit for this year's successful filing period again goes to the American people for the honest and conscientious way that the vast majority met their tax responsibilities.

We in the Service recognize our obligation to provide you with the information and assistance you need in order to prepare your return and in 1975 we continued to improve these services.

We also recognize our obligation to carry out a strong enforcement program to assure you, the many taxpayers who conscientiously comply with the law, that those few who do not will be held accountable. That is why we have done our best to design an enforcement program that is fair, effective and comprehensive—one designed to treat all taxpayers uniformly and with full recognition of their legal rights.

This report describes these activities and others. It discusses our continuing efforts to make sure that taxpayers understand their rights as well as their responsibilities under the law. It describes technical and administrative activities that may not be apparent to most taxpayers but which are necessary to the overall job of tax administration. A new chapter on Employee Plans and Exempt Organizations describes how we carried out our new responsibilities under the Employee Retirement Income Security Act of 1974.

We hope that this report will help you better understand tax administration and enforcement.

Assisting Taxpayers

The American tax system depends upon self-assessment and voluntary compliance. Every year, taxpayers must make their own determination of their income, exemptions, and deductions, compute their tax liability, and file returns reporting the correct tax. The Internal Revenue Service is fully aware that taxpayers do not find this an easy task and recognizes its responsibility to help them as much as possible. The IRS believes that with the assistance it provides through answering taxpayers' questions, most individual taxpayers should be able to prepare their own returns.

In recent years, the IRS has expanded its taxpayer service function, improved the training of taxpayer service representatives, offered toll-free telephone assistance, extended the normal business hours of many IRS offices, and made special efforts to help low-income, elderly and non-English speaking taxpayers.

During 1975, the Service received about 40.6 million written, telephone and walk-in inquiries, compared to 34.5 million in 1974. The total in 1975 consisted of over 29 million telephone calls, more than 11 million walk-in inquiries, and more than 190,000 written inquiries. More than 60 percent of these inquiries occurred during the filing period from January 1 through April 30, 1975. During that period, the IRS received more than 16 million telephone calls, about 8 million walk-in inquiries, and over 50,000 written inquiries—a total of nearly 25 million requests for assistance.

Walk-in taxpayer service was offered in 750 permanent offices and nearly 300 temporary locations in 1975. For taxpayers unable to call or visit an IRS office during normal business hours, 550 offices extended their hours into the evening on weekdays or were open on Saturdays.

The number of taxpayer service representatives was increased from about 1,900 to over 2,300 this year and their training was expanded so that they could provide better service to taxpayers.

While taxpayers were encouraged to prepare their own returns, IRS personnel prepared returns for those who needed such assistance.

In July 1974, taxpayer service was reorganized at the district level, separating this function from enforcement activities. Under this change, the collection and taxpayer

service functions now have equal organizational status in all IRS districts. This organizational realignment provides for year-round managers who can give closer attention to the program, identify and correct problem areas, and improve the quality of the program.

Telephone Assistance

Toll-free telephone service was again offered in all 58 IRS districts in all 50 states. The actual number of answering sites was reduced from 135 in 1974 to 85 this year, which improved the quality and depth of assistance to taxpayers at each location.

Under this system, any taxpayer in the United States may call the IRS for assistance without having to pay a long-distance telephone charge. Toll-free numbers are listed in the income tax return packages provided to taxpayers. They may also use the toll-free telephone network to call the IRS for clarification of many of the computer-generated bills and notices relating to their accounts. These notices are accompanied by an enclosure which lists a toll-free telephone number and suggests that the taxpayer use the number to obtain assistance or further explanation.

Gabriell Mitchell, a taxpayer service representative in the Springfield District, answers a taxpayer's inquiry about Federal taxes on the toll-free telephone system.

Tax Form Improvements

Other correspondence with taxpayers now contains a telephone number and, on manually prepared items, the name of an IRS employee to call if there are any questions about the item of correspondence.

The toll-free telephone system has provided taxpayers with greater telephone access to IRS offices and has made the entire assistance program more efficient by reducing the need for a taxpayer to visit an IRS office.

Special Assistance Programs

Special efforts were made in 1975 to meet the needs of the elderly and low-income taxpayers unable to visit IRS offices by providing them with income tax assistance in their own neighborhoods. Over 73,000 low-income and almost 26,000 elderly taxpayers were served in 1975.

The Service again provided special assistance to taxpayers speaking foreign languages with 148 IRS offices offering tax assistance in Spanish and 154 offices providing help in other foreign languages.

Nearly 800,000 taxpayers received assistance under the Volunteer Income Tax Assistance Program (VITA) in 1975. The Service trained more than 23,000 volunteers, who provided free assistance to elderly, Spanish-speaking, low-income and other taxpayers in their communities.

The successful 1975 filing period may be attributed partly to the fact that we made little change in the 1974 individual income tax forms, and taxpayers could use their 1973 forms as a guide in preparing their 1974 returns. Returns were more completely and accurately prepared with fewer taxpayer errors this year.

Among the minor changes we made on this year's return was the addition of a "no" box for the 1976 Presidential Election Campaign Fund check-off allowing taxpayers to check either "yes" or "no" regarding their desire to contribute to the Fund.

Schedule B (Form 1040) was reintroduced for the reporting of dividends and interest. Many taxpayers and practitioners found the reinstatement of this schedule helpful in correctly reporting such income.

We added lines on Schedule A to itemize deductions for taxes, interest, and miscellaneous expenses, and provided additional space on Schedule D for listing capital gains and losses.

Over 2.6 million tax packages sent to farmers and fishermen were printed on recycled paper as a cost reduction and environmental experiment. Public reaction was generally favorable.

The Tax Reduction Act of 1975 required the IRS to revise a number of major forms and to develop new forms including: New Form 1120-FY (1974-75), Corporation Fiscal Year Tax Computation Schedule; Revised Form 1120-W (1975), Corporation Estimated Income Tax; New Form 1040-FY (1974-75), Individual Fiscal Year Tax Computation Schedule; Revised Form 1040-ES, Individual Worksheet for Computation of Estimated Tax; New Form 5404-FY (1974-75), Credit for Purchase or Construction of New Principal Residence; Revised Form W-4, Employee's Withholding Allowance Certificate; Revised Circular E, *Employer's Tax Guide*; Revised Publication 493, *Supplement to Circular E*; and New Publication 870, *Tax Tables for 1975 Filers or 1974-75 Fiscal Year Filers*.

During 1975, a number of new pension forms were developed to implement the Employee Retirement Income Security Act of 1974, including: Form 5301, Application for Determination; Schedule A (Form 5301), Plan Characteristics Relevant to the Issuance of a Determination Letter; Form 5302, Schedule of 25 Highest Paid Participating Employees; Form 5304, Application for Determination-Individual Retirement Account; Form 5305, Individual Retirement Trust Account; Form 5303-A, Individual Retirement Custodial Account; Form 5306, Application for Approval of Prototype Individual Retirement Account; and Form 5330, Return of Initial Excise Taxes on Prohibited Transactions.

Communications With Taxpayers

During 1975, the IRS improvement of form letters, computer notices, and other similar taxpayer communications continued to be a major objective. A special unit of writer-editors now reviews all such standard communications to humanize them and to make sure they are clear and understandable to the average taxpayer. National Office units and field offices reviewed a total of 2,069 forms during the year, and were able to eliminate 553 of them as duplicative or unnecessary.

The Service continues to try to make all taxpayers aware of their rights under the tax laws and to provide complete and courteous responses to taxpayer inquiries.

Tax Publications

To reinforce information provided taxpayers during direct contact, and to assure nationwide consistency in the application of the tax laws, the Service also distributes, free of charge, a number of publications.

The major IRS publications are Publication 17, *Your Federal Income Tax*, Publication 334, *Tax Guide for Small Business*, and Publication 225, *Farmer's Tax Guide*. Also the Service has issued publications dealing with special tax problems, such as reporting the sale of a personal residence or computing the value of donated property. New tax publications developed in 1975 included Publication 587, *Tax Information on Operating a Business in Your Home*; Publication 588, *Tax Information on Condominiums and Cooperative Apartments*; Publication 589, *Tax Information on Subchapter S Corporations*; and Publication 590, *Tax Information on Individual Retirement Savings Programs*.

In 1975, we inaugurated free distribution of Publication 17, *Your Federal Income Tax*, and Publication 334, *Tax Guide for Small Business*, items that we had charged for previously. Distribution reports for 1975 show that 1.5 million copies of Publication 17 and 600,000 copies of Publication 334 were distributed to taxpayers at no charge.

These publications, along with copies of the various tax forms, were available to individual taxpayers at IRS offices throughout the country on a walk-in basis. Many banks and post offices also cooperated by making IRS forms available to taxpayers. As another option, the taxpayer could order forms or publications by writing or telephoning IRS offices. Over 4.4 million of these orders were filled during the last half of 1975. In addition, over 79 million individual income tax packages were mailed to taxpayers in advance of the filing period.

The Mass Media

The Service continued to use the nation's mass media to furnish tax information to the public. In 1975, over 17,000 radio and TV stations, daily and weekly newspapers, and magazines received material prepared by the IRS to inform and assist taxpayers. Service personnel participated in 6,500 interviews, answered more than 18,000 media inquiries, and made 5,500 talks to citizen groups.

Nearly 8,800 news releases were issued to the media. These releases covered such topics as services available to taxpayers, appeal rights, correct filing of returns, the Presidential campaign fund check-off, tax advice for disaster victims, and the tax rebate program. Some of the releases were translated into Spanish for use in areas where it is widely spoken as a second language. Tax question-and-answer columns were written for nationwide distribution to weekly newspapers and magazines.

The Service also produced and distributed to field offices a 27½-minute color film on audit and appeals procedures. This IRS film was shown on 393 occasions by TV outlets and 2,670 occasions by civic associations and educational groups from January through June of 1975.

Electronic Tax Service

The Integrated Data Retrieval System (IDRS), which links all district and area offices and Puerto Rico through video terminals to computer files at the IRS service centers, processed an average of 1.8 million inquiries per service center each month during the last half of 1975.

To cope with the rapid growth in use of IDRS since it was made operational in 1974, the Service has installed larger computers and related components with faster processing capabilities at all ten IRS service centers. For example, the IDRS can now report on a taxpayer's refund status and on rebates, which accounted for voluminous taxpayer contacts in 1975.

This increased IDRS capability will also provide a better method of controlling information concerning the number of audits being conducted, their status and their disposition. The new system, the Audit Information Management System (AIMS), will be installed and operating on a pilot basis in 1976 and is scheduled to be operating nationwide in 1977.

Chapter 2**Collecting the Revenue****Receipts, Refunds, and Returns
Filed****Rebate Program****Presidential Election Campaign
Fund****Income Sources on Magnetic
Tape****Mathematical Verification**

Receipts, Refunds and Returns Filed

A principal responsibility of the Internal Revenue Service—probably the world's largest collection agency—is the collection of tax revenues. In 1975, gross tax collections rose to a record high of \$293.8 billion, an increase of \$24.9 billion or 9.2 percent over 1974, in spite of such counteracting influences as the economic slowdown, and various provisions of the Tax Reduction Act of 1975.

Individual and corporation income taxes accounted for over two-thirds of all tax receipts. Individual income tax receipts, representing more than half of the total, were \$156.4 billion, an increase of \$13.5 billion or 9.4 percent over the previous year. Corporate income tax collections amounted to \$45.7 billion, up \$4.0 billion (9.6 percent) over 1974.

Employment taxes (Social Security, Unemployment and Railroad Retirement), the second largest source of revenue, totaled \$70.1 billion, a rise of \$8.0 billion or 13.0 percent over 1974. In the two previous years, increases were in excess of 19 percent. The increase in 1975 did not equal this previous growth rate mainly because of smaller increases in the social security tax rate and the maximum amount of earnings subject to tax.

Returns Filed and Refunds Issued, Individual Income Tax* January-June (Cumulative 000's; cumulative percentages)

1974	Jan	Feb	Mar	Apr	May	June

Volume	895	21,989	41,494	55,130	63,598	64,730
Percent	1.4	34.0	64.1	85.2	98.3	100

*Refunds processed by National Computer Center and scheduled for issuance by Regional

Excise taxes, levied on a variety of products, services, and activities, declined slightly. Receipts from these taxes totaled \$16.8 billion, dipping \$0.3 billion (1.5 percent), reflecting the continued phasing out of the telephone excise tax, elimination of the Interest Equalization Tax, and an overall net reduction in receipts from auto and energy related excise taxes.

Although it is the Service's job to collect revenue, the IRS also makes refunds of any excessive payments. In 1975, 67.8 million regular refund checks were issued, 2.0 million more than in 1974. Regular refunds this year totaled \$32.2 billion, \$4.0 billion or 14.2 percent more than last year.

In addition to regular refunds, rebates of 1974 individual income taxes, as provided by the Tax Reduction Act of 1975, totaled \$7.9 billion. Some 54.7 million checks were issued for the rebate alone and 9.1 million checks combined the rebate with a regular refund. (Further detail on the rebate program is provided on page 18.)

IRS service centers received 125.1 million tax returns in 1975, compared to nearly 122 million in 1974. Individual and fiduciary returns totaled 85.5 million, compared to 83.0 million in 1974. More than 22 million individual taxpayers, 27 percent of all indi-

vidual filers, used the short Form 1040A in 1975. Perhaps influenced by the economy, many taxpayers filed earlier this year. Anticipating taxpayers' need for a prompt refund, the Service responded by processing returns faster than in any year in history.

Number of returns filed, by principal type of return (Figures in thousands. For details, see table 7 in Appendix.)

Type of return	1974	1975

¹ Collections are adjusted to exclude amounts transferred to the Government of Guam.

² Estimated.—Collections of individual income tax withheld are not reported separately from old age, survivors disability and hospital insurance taxes on wages and salaries. Similarly, collections on individual income tax not withheld are not reported separately from old-age and disability insurance taxes on self-employment income. The amount on old-age, survivors, disability and hospital insurance tax collections shown is based on

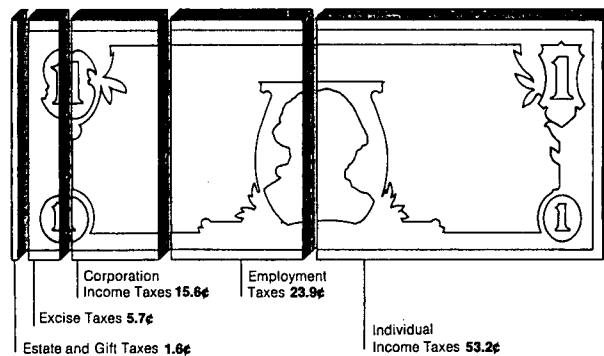

estimates made by the Secretary of the Treasury pursuant to the provisions of sec. 201(a) of the Social Security Act as amended, and includes all old-age, survivors disability and hospital insurance taxes. The estimates shown for the 2 classes of individual income taxes were derived by subtracting the old-age and disability insurance tax estimates from the combined totals reported.

³ Includes Presidential Election Fund amounting to \$27,592,000.

⁴ Includes Presidential Election Fund amounting to \$31,696,525.

¹ Does not include interest paid on refunds.

² For details see tables 5, 6, and 19 in Appendix.

³ Includes rebates under the 1975 Tax Reduction Act.

The Tax Dollar Where It Came From

Fiscal Year 1975 (Net Collections)

The Pipeline

Tax returns received at IRS service centers are systematically processed through a series of steps known as "the pipeline." Although service center machinery is modern, automated and organized to perform the processing function in the shortest period of time, many of the operations are performed by people. It is people, as this photo series illustrates, who unload the mail sacks bulging with tax returns, operate the machines that open the envelopes, sort, batch, number, examine and code returns, program information from the returns into computers, and most important of all, certify returns for refunds. These photographs were taken at the IRS service center in Ogden, Utah.

Step 1 Income tax returns are received at the service centers.

Step 2 Envelopes are opened and counted at the rate of 10,000—12,000 per hour.

Step 3 Returns are sorted by type of return.

Step 4 Tax returns and accompanying checks are compared.

Step 5 Returns are edited and coded for computer processing.

Step 6 Tax return information is fed into the computer.

Step 7 IRS computers perform validity checks on tax returns.

Step 8 Refund checks are printed by Treasury Department Disbursing Center.

Rebate Program

On March 29, 1975, the President signed into law the Tax Reduction Act of 1975, P.L. 94-12, which provided for a number of measures designed to reduce taxes for individuals and corporations, including the rebate of a portion of income taxes paid for 1974 to nearly 70 million individual taxpayers. Generally, the law authorized a rebate of 10 percent of the individual's 1974 income tax liability, with a minimum rebate of \$100 and a maximum of \$200. If a taxpayer's 1974 income tax was less than \$100, the rebate would equal the amount of tax actually paid. In addition, if the taxpayer's adjusted gross income was between \$20,000 and \$30,000, the \$200 maximum rebate was reduced by one percent of adjusted gross income in excess of \$20,000 up to \$30,000. Thus, taxpayers in this income bracket received checks for amounts between \$100 and \$200. Taxpayers with adjusted gross income in excess of \$30,000 received \$100. While the intent of the Congress was to concentrate the tax reductions among lower and middle income taxpayers, these minimum, maximum and phase-down provisions confused many taxpayers and prompted a great many inquiries to the IRS.

The rebate was enacted midway in the 1975 filing period and at the peak of returns processing. By planning for the rebate even before the President signed the law, however, the Service was able to implement its rebate program in late April and insure that the first of the rebate checks would be mailed to taxpayers on May 9, 1975. The bulk of rebate mailing had been completed when the fiscal year ended June 30. The table at right provides details of the rebate program.

Rebate Check Processing At the Bureau of Accounts, Washington Disbursing Office, the woman (rear right) manually reviews numerical sequence of checks, while the man in the foreground inserts checks for machine verification prior to insertion in envelopes.

Rebate Program Amounts and Applications (through June 30, 1975)

Number of rebate credits	65.5 million
Amount of rebate credits	\$ 8.2 billion
Average rebate credit	\$125.39

Application ¹ of rebate credits:	
Refunded ² —Number	63.8 million
Amount	\$ 8.0 billion
Average	\$124.74

Applied to outstanding balance due or temporarily unapplied pending resolution of taxpayer's account

Number	3.5 million
Amount	\$ 0.3 billion

Details may not add to totals due to rounding.
¹ Applications exceed the total rebates because some rebates were partially refunded and partially applied to an outstanding balance due.
² Rebates processed by National Computer Center and scheduled for issuance by Regional Disbursing Centers to taxpayers. Includes \$21.4 million scheduled in June 1975 and issued the first week in July 1975. By the end of June 1975, \$7.9 billion in rebates had been issued.

Milwaukee Postmaster Emerson Paulson shows Commissioner Alexander the first batch of rebate checks to be delivered to taxpayers in

Milwaukee. On this date, May 8, 1975, the Commissioner was visiting the Milwaukee District Office. (Photo Courtesy of Milwaukee Journal)

Presidential Election Campaign Fund

The IRS processed approximately 81.7 million individual returns between January 1 and June 30, 1975. Of that total, 19.8 million or 24.2 percent had designations for the Presidential Election Campaign Fund, compared to 13.6 percent in the prior year. A block, indicating the taxpayer's desire not to designate to the fund, was placed on the return for the first time this year. Of the total returns processed, 33.7 million or 41.2

percent checked this block, thus declining to designate.

The total amount credited to the Fund during fiscal year 1975 was \$31.7 million, including \$31.5 million on 1974 returns and \$0.2 million from prior year returns. The cumulative amount credited to the Fund (1972, 1973 and 1974 returns) since the check-off was initiated is approximately \$61.7 million.

Mathematical Verification

During the year, the IRS checked the mathematics on 84.6 million individual returns. The IRS calculated the tax on 1.0 million returns, manually verified the tax on 2.5 million returns and computer verified the accuracy of taxpayers' calculation of tax on 81.1 million returns. As a result of computer verification, 1.8 million taxpayers had decreases in the tax liability shown on their returns totaling \$163 million, an average of \$93 per return. These decreases resulted in either a larger refund for the taxpayer or a smaller tax due billing. On 2.0 million re-

turns, errors by taxpayers increased their tax liability by \$270 million, an average of approximately \$134 per return. The results of this year's computer mathematical verification program are shown in the table below.

In addition to mathematical verification of returns, the Service also used its computers to check the estimated tax credits claimed on individual returns. This verification determined that taxpayers underclaimed \$185 million in estimated credits and overclaimed credits by \$402 million.

Individual Income Tax Returns Mathematically Verified By Computer (In Thousands)

	1974	1975
Number verified by computer	81,649	81,067

Amount	\$177,890	\$163,251
Average amount (dollars)	\$ 89.53	\$ 92.91

Income Sources on Magnetic Tape

During 1975, the IRS received more than 428 million information documents from businesses and organizations required to report payments of wages, interest, and dividends. Nearly 181 million of these documents were submitted on magnetic tape in 1975 as a result of the Service's program of actively encouraging all organizations which have tape capability or access to computers to report on tape. The increase in the number of reporting entities to 15,500 reflects a shifting by many organizations from paper filing to magnetic tape filing.

Information Documents Reported on Magnetic Tape

Chapter 3

Insuring Compliance

Audit of Returns Delinquent Accounts The Appeals Process Tax Fraud Investigations

Audit of Returns

The IRS audits tax returns in order to help ensure the highest possible degree of voluntary compliance with the tax laws. While audit activity is the primary method that the IRS uses to encourage voluntary compliance, every return is subject to scrutiny by IRS employees and computers. When a return is received in one of the 10 IRS service centers, it is first checked manually for completeness and accuracy and certain obvious errors such as the claiming of a partial exemption or duplicate deductions. Then the service center's computers check the accuracy of the taxpayer's arithmetic (See Mathematical Verification, page 20) and pick up other errors which may have escaped manual detection, such as the failure to reduce medical deductions by 3 percent of adjusted gross income.

Returns Selection

The primary method used by the IRS in selecting returns for audits is a computer program of mathematical formulae—the Discriminant Function System (DIF)—which measures the probability of tax error in each return. Returns identified by the DIF system as having the highest probability of error are then reviewed manually, and those confirmed as having the highest error potential are selected for audit. Since this system was introduced in 1969, the IRS has reduced the number of taxpayers contacted whose audit would result in no tax change (all taxes) from a peak of 43 percent in 1968, to a historic low of 23 percent in 1975.

For the first time in 1975, the Service began using the DIF system for the selection of partnership returns. In 1975 and 1976, a Taxpayer Compliance Measurement Program (TCMP) will be conducted on fiduciary returns. Filing and reporting characteristics identified by this program will be used to determine the feasibility of developing DIF formulae for fiduciary returns.

Returns are also selected for audit through the application of certain criteria during the initial computer screening process which automatically trigger selection of the return. Returns may also be chosen for audit under a third computerized selection system, the Taxpayer Compliance Measurement Program (TCMP), which makes a random selection of returns within income classes for

research purposes, such as updating DIF formulae on more current taxpayer filing and reporting characteristics. Audits conducted under this program must be more intensive than most in order to develop the information required by the program.

The computer selection of returns is complemented by manual selection in various instances. For example, if the IRS is auditing the return of a partnership (or of one business partner) the returns of the partners (or additional partners) may also be audited. Other returns may be manually selected as a result of information from other enforcement activities, news reports or criminal investigations. The IRS also screens returns with adjusted gross income above certain limits and returns of taxpayers who submit claims for refund or credit after filing their returns.

Results of Audit Activity

The IRS audited 2,465,000 tax returns of all types in 1975, 277,000 more than the 2,187,864 audited in 1974. The 1975 total was more than in any year since 1969, when 2,543,929 were examined. Of the total returns audited in 1975, 112,550 were examined by service centers, compared to 80,200 last year. The remainder were examined in district offices by either revenue agents or tax auditors. Examinations conducted by revenue agents under field audit techniques totaled 812,336 returns, an increase of 123,279 returns or 18 percent over last year. Examinations conducted by tax auditors under office audit procedures numbered 1,540,466 returns, an increase of 121,859 returns. Audit coverage of income, estate and gift returns increased to 2.55 percent, compared to 2.39 percent achieved in 1974.

The Service's examination program resulted in \$5.3 billion of additional tax and penalties recommended. While recommendations exceeded \$5 billion for the third straight year, the total was about \$600 million below last year, mainly because there were nearly 600 fewer returns with unusually large deficiencies of \$100,00 and over.

³ 1974 Revised Data

During 1975, assessments totaled a record \$4.5 billion, including an all-time high of \$3.8 billion in assessed tax and penalties and \$695 million in interest. In 1974, assessments amounted to \$3.7 billion, of which \$3.1 billion represented tax and penalties and \$626 million represented interest.

Examining officers are required to determine a taxpayer's correct tax liability—no more, no less. This means that examiners look for indications that taxpayers have overstated, as well as understated, their tax liability. In 1975, Service examinations disclosed overassessments on 122,399 returns, accounting for refunds of \$302.8 million.

Service Center Examinations

The IRS service center review program began in 1972. It is generally limited to the verification or resolution of issues which can be satisfactorily handled by service center personnel through correspondence with the taxpayer. More than 1,329,000 returns were checked in service centers in 1975, an 86 percent increase over 1974.

James Whitmore, well-known actor, discusses IRS audit procedures with Karne Podsadecki, office auditor, in a scene from the IRS film, "Why me, Tom Krolik?" Eight other IRS employees, along with professional talent, appear in the

More than half of these returns involved obviously unallowable items, such as medical expenses not reduced by the 1 percent and 3 percent limitations. More than 952,000 returns with unallowable items were corrected in 1975, compared to approximately 406,000 in 1974. Another major issue verified by service center personnel through correspondence with taxpayers this year was that of taxpayers claiming to be heads of households. Approximately 209,000 returns claiming such status were verified in 1975, compared to 195,000 last year.

The service centers also conducted correspondence examinations of returns selected under district office criteria involving issues such as charitable contributions or interest payments, which generally can be resolved through correspondence with the taxpayer. Approximately 112,550 returns in this category were examined during 1975, an increase of nearly 40 percent over the 80,200 examined in 1974.

27 1/2-minute film, which highlights taxpayers' rights in dealings with the IRS. Among the topics discussed in the film are audits and appeals, delinquent taxes, taxpayer service and the processing and confidentiality of tax returns.

² 1974 Revised Data

Computer Assisted Audits

The Service is keeping pace with the growing number of automated accounting systems by expanding the use of computers in audits. Both generalized computer programs and specifically developed programs are used to retrieve and analyze data essential to the examination. They permit an automated "eye-balling" of massive data files with the printout of only those items of possible audit interest. Both taxpayers and the IRS save time and expense since computer-assisted audits can be done in a fraction of the time needed to do the same job manually.

These audits are done by computer audit specialists, experienced revenue agents who have received intensive training in computer hardware, programming languages and audit techniques. They work with automated accounting systems. During 1975, the number of these specialists was increased from 84 to 104, including, for the first time, two women revenue agents.

The Program Audit Library (PAL), a system of generalized computer programs developed by the Service and designed specifically for tax audits, was updated and expanded in 1975. In addition, the IRS has developed computer programs to perform statistical sampling techniques which will soon become part of the PAL System.

Computer audit specialist Leo Terr checks final output of hardcopy which will become part of his workpapers.

Coordinated Examination Program

Since larger corporations have complex accounting operations and present complex tax issues, the Service has increasingly turned to the team audit or coordinated examination approach when reviewing their accounts. This approach combines the skills of the accountant-revenue agent with those of economists, computer audit specialists, international tax examiners, engineering agents and employee plans examiners.

At the end of 1975, the 1,176 large cases identified by the National Office averaged 2.6 open years. This is the third consecutive year in which the average of open years in the large case program has been less than three.

The IRS, during 1975, expanded its practice of conducting industry-wide audits involving the contemporaneous examination of all major companies in a given industry.

So far, these audits have not only saved time for the Service and the taxpayers, but have also resulted in greater uniformity of tax treatment among the industries examined. Five industries are currently being audited by this technique.

Joint Committee Review

The Internal Revenue Code provides that all income, estate and gift tax refunds and credits which exceed \$100,000 must be reported to the Joint Committee on Internal Revenue Taxation. During 1975, 1,356 cases involving overassessments of \$969 million were reported to the Joint Committee, as compared with 1,671 and \$1.1 billion in 1974.

Tax Shelter Program

In 1974, the IRS established a nationwide tax shelter examination program coordinated by the National Office. Due to the multi-district involvement of promoters and investors, these examinations were conducted under the industry-wide audit concept. The use of this approach insures a greater degree of consistency and uniformity in the Service's overall treatment of the tax aspects of shelter programs.

During 1975, industry-wide examinations of tax shelters were conducted by field personnel analyzing the entire enterprise first to determine whether participants, barring unexpected problems, can reasonably be expected to earn a profit appropriate to the investment and degree of risk involved. The business is then studied for the possibility of improper or excess allocation of deductions and also to make certain that individual items causing operating losses are properly claimed deductions.

Based on experience acquired in 1975, the IRS will continue to identify and examine other abusive tax shelter areas using industry-wide audit methods when appropriate. Possible tax shelter abuses by investors in oil, real estate, cattle, equipment leasing and motion picture industries are being studied.

The large size of the partnerships involved in this program (often thousands of individual partners) presented a major clerical problem in controlling large numbers of related returns and in processing subsequent audit adjustments to individual partners. The IRS has, when possible, automated the manual workflow involved in the audit of large scale partnerships and now has the capacity for computer-generated audit control documents and audit adjustment reports associated with these examinations.

National Shared Library

The Service has established a National Shared Library on the GSA-approved Intranet Time-Sharing Computer System which is utilized as a technical and administrative tool in performing the complex work involved in many examinations. The initial computer program placed in this library will recompute the highly complex Form 1120L Insurance Company Return to reflect audit adjustments and generate a marginal tax table for each return. This shared system avoids duplication of storage charges, since authorized users in IRS districts and regions do not have to store programs in a separately maintained library. It also facilitates standardized and consistent program changes or updates.

Computer Production of Report on Audit Changes

The IRS completed a study in 1975 on the type of report writing equipment necessary to produce Form 1902-E, The Report of Individual Income Tax Audit Changes, for audit operations at service centers and district offices. It was found that existing service center computer systems could best fulfill Form 1902-E requirements for the service center audit divisions since this type of equipment was on-site and affords a low user cost. A computer program was implemented at all service centers to generate both the basic Form 1902-E and its accompanying Form 3547, Explanation of Adjustments, consisting of standard explanations of adjustments. However, the study also showed that on-site equipment was also needed in district offices to service the office audit workload. As a result, efforts are presently underway to replace older machines in district audit operations with more modern and efficient report writing equipment.

Delinquent Accounts

The Service makes every reasonable effort to collect taxes due, starting with notices to taxpayers requesting payment and then establishing delinquent accounts for assignment to enforcement personnel.

In 1975, IRS district offices closed over 2.9 million delinquent accounts receivable cases, including approximately 376,000 cases in which the taxpayer, when notified of a delinquency, contacted the IRS field offices to resolve the matter ("notice" cases). The remaining 2.5 million delinquent accounts required field contact by district employees. Approximately 58 percent of these delinquent accounts involved business taxpayers.

More than \$2.8 billion in delinquent taxes was collected during the year, an increase of \$292 million over 1974. District personnel also closed over 1.2 million delinquent return investigations, including 168,000 cases in "notice" status. In addition, 388,000 contacts were made by district personnel in the returns compliance program, which detects the non-filing of tax returns. These efforts secured 943,000 delinquent returns involving nearly \$548 million in additional taxes.

The Service has long recognized that preventing a delinquency is at least as important as collecting a delinquent account. The delinquency prevention program, which was given new emphasis in 1974, contin-

ued this year. Business taxpayers identified as posing significant risks of becoming tax delinquents were contacted by district collection personnel in an effort to help the taxpayers eliminate the cause of the potential delinquency and meet all tax obligations.

Withholding Tax Laws Strictly Enforced

In recent years, an increasing number of business taxpayers have failed to deposit and pay over the money they withhold from their employees' salaries. Instead, these trust funds have been improperly used as working capital or otherwise diverted. The Service uses a number of approaches with these employers to enforce compliance with the law regarding withholding requirements.

Under the Federal Tax Deposit Alert program, the Service's data processing system identifies employers who are not making appropriate deposits. Before the return is due, revenue officers call on these employers to learn why they have not complied with the deposit requirements.

To accelerate the billing of delinquent employers, delinquent accounts covering withheld tax are taken out of the ordinary processing cycle and immediately assigned to the district offices.

Restaurant owners David Hedison and Pat Finley, stars of new IRS film, "Hey, We're in Business," mix business record keeping, taxes, and a late snack shortly after opening their restaurant in this scene from the film. Among the areas covered by the film are the necessity of proper recordkeeping, free

taxpayer assistance available from IRS offices, what a business should do if tax deadlines cannot be met, and withholding tax responsibilities relating to employees. The film can be borrowed free from the IRS by contacting any district office.

The Service believes that another answer to this abuse and to the general problem of taxpayers using the government's money rather than borrowing funds through legitimate means is Public Law 93-625, which raised to 9 percent the interest rate on tax delinquencies. This rate will be adjusted periodically to reflect changes in the prevailing prime rate charged by major banks.

The IRS also is vigorously pursuing civil and criminal sanctions against noncompliant taxpayers. Public Law 85-321 provides for a \$5,000 fine and/or a year in prison for failure to deposit withheld taxes properly. During 1975, an intensified program resulted in 127 convictions and guilty pleas in such cases.

Collection Initiatives

The Service also undertook, during 1975, a thorough reappraisal of delinquent tax collection practices. The goal was to make the collection process more clearly understood by the taxpayer and to ensure that the tax laws are administered in a fair, impartial manner. To accomplish this goal, a major program, "The Collection Initiatives," was implemented and its changes are now showing results.

Some of the changes being considered or already implemented include: 1) the acceptance of postdated checks to cover the terms of an installment-payment agree-

ment, for the greater convenience of taxpayers and the IRS; 2) expanded use of payroll deduction agreements; 3) reduction of the amount of information taxpayers must furnish on financial statements; 4) routinely extending installment arrangements to first-time delinquent individual income taxpayers who are otherwise in full compliance with the tax laws; 5) the substitution of a telephone contact for one of four written notices to explain the seriousness of tax delinquency and to help the taxpayer avoid drastic enforcement action, such as levy or seizure; 6) greater supervisory review before the property of a delinquent taxpayer is seized; 7) a review of the legislative and procedural exemptions and exclusions from our levy authority.

Also, the procedure for administering Public Law 85-321 has been strengthened and will be expanded to encompass a larger number of chronic trust fund delinquents. Uniform criteria for selecting, investigating and preparing trust fund prosecution cases have been established to better ensure quality referrals to the Department of Justice. As part of the revised "Trust Fund Compliance Program," noncomplying taxpayers who are not the subject of a criminal prosecution recommendation, as an alternative, will be required under Treas. Reg. 6011(a)-5 to file returns and pay withheld employment taxes monthly instead of quarterly.

Gross tax, penalties and interest resulting from direct enforcement (In thousands of dollars)

The Appeals Process

IDRS

Delinquent accounts are controlled by the Integrated Data Retrieval System (IDRS), which automatically issues and controls case assignments, monitors index files, computes interest and penalties on accounts, allows direct input of payments on accounts, issues certain correspondence and forms, and provides necessary management reports.

Administrative Appeals

The Internal Revenue Service encourages the resolution of tax disputes through an administrative appeals system rather than through litigation. Taxpayers who disagree with a proposed change to their tax liability are entitled to a prompt, independent review of their case. The appeals system is designed to minimize inconvenience, expense, and delay to the taxpayer in disposing of contested tax cases.

Within the system, there are two levels of appeal: the district conference staff in the audit division of the district director's office and the appellate division in the regional commissioner's office. Each level of appeal is independent of the other, and each has different authority and jurisdiction. Their common and principal objective is the early disposition of disputed cases with a fair and impartial application of the law. For the initial appeal conference, a taxpayer may choose either the district conference staff or the regional appellate staff. Opportunities for such a hearing are offered at 58 district offices and 36 regional offices throughout the country. Conferences are also arranged as needed at other IRS locations by circuit-riding conferees at places and times convenient to the taxpayer.

Proceedings are informal in both of these offices. Taxpayers may represent themselves or be represented by an attorney, accountant, or any other advisor enrolled to practice before the IRS. If the disputed tax liability is \$2,500 or less the taxpayer may obtain a district conference and a subsequent regional conference without filing a written protest. At the conference, taxpayers are given the opportunity to present their views and discuss the merits of the issues. If agreement cannot be reached during the district conference, the taxpayer is advised of his or her further appeal rights and may then request a regional appellate office conference.

In a majority of cases, the taxpayers and district or regional conferees reach a mutually acceptable basis for resolving their tax disputes. Consequently, very few cases go to trial. In the past 10 years, 97 percent of all disputed cases were closed without trial. District conference staffs reached agreement with the taxpayer in about 75 percent of the cases considered. In 1975, the appeals function disposed of 54,945 cases by agreement; the Tax Court tried 967 cases; and the United States District Courts and Court of Claims tried 376 cases. Thus in disputed tax matters, the administrative appeals system continues to serve taxpayers well. The system provides for an expeditious, independent, and impartial review of tax cases, and one measure of its success is its ability to resolve the great majority of tax disputes efficiently and without litigation.

Appellate Workload

The cases considered in the appeals process cover a wide range of issues from the most elementary to the most complex. They involve additional taxes or claims for refund ranging from small amounts to millions of dollars, including individual and corporation income tax, estate tax, gift tax, excise tax, employment tax, and offers in compromise. Deficiency cases can also be considered before a petition is filed in the Tax Court (nondocketed cases) and after the petition has been filed (docketed cases). Nondocketed cases make up about 62 percent of the appellate workload. In 1975, 75 percent of the nondocketed cases closed by appellate offices were closed by agreement with the taxpayer. The remaining 38 percent of the appellate workload consists of docketed cases in which settlement negotiations continue in appellate offices after the filing of the petition. In 1975 approximately 75 percent of the docketed cases completed by appellate offices were closed by agreement with the taxpayer.

District Conference Settlements

Since April 1, 1974, district conference staffs have had the authority, where the amount of tax in dispute was \$2,500 or less, to settle cases by taking into account the hazards of litigation, including the chance that the Service might lose the case if it were litigated. Previously, only appellate conferees had this settlement authority, which meant that many taxpayers had to take their case to the regional appellate office in order to resolve unclear issues.

Since receiving this settlement authority, district conference staffs have significantly increased the percentage of agreed cases. About 25 percent of the cases where the new settlement authority could be exercised to resolve doubtful issues have been settled. The results have been favorable to taxpayers in terms of time, convenience and expense as well as to the IRS in terms of reducing the number of cases going to the regional appellate office or to the Small Case Division of the United States Tax Court.

Other Appeal Options

If a tax dispute cannot be resolved at either the district or the regional level, the taxpayer is advised of his or her remaining appeal rights. Generally, the taxpayer may petition the United States Tax Court. When the disputed tax does not exceed \$1,500, a simplified procedure is available under the Tax Court's Small Case Rules. Except in unusual circumstances, the timely filing of a petition with the Tax Court prevents the assessment and collection of the tax until the court has made its decision. Even if a petition is filed with the Tax Court and the case is docketed for trial, the case may be settled with the regional appellate office at any time before the trial begins.

If the taxpayer does not want to litigate a case in the Tax Court, he or she may pay the tax deficiency and file a claim for refund within two years from the date of payment. The same administrative appeals are then available to the taxpayer. If the claim is denied by the IRS, or if the IRS takes no action within six months, the taxpayer may file suit against the Government for refund in either a United States District Court or the Court of Claims.

Tax Fraud Investigations

The Intelligence Division is responsible for the enforcement of the criminal provisions of the tax laws. Special agents investigate evasion of income, estate, gift and excise taxes, failure to file returns, failure to remit trust fund taxes (withheld income and social security taxes) the filing of false withholding exemption statements and false claims for refunds and the preparation of false returns for others. When evidence of tax evasion or tax fraud is identified, the Intelligence Division investigates and recommends prosecution when warranted.

Special projects are sometimes carried out to determine the extent of noncompliance in a given geographical area or occupational field, if a pattern of noncompliance is detected, or to increase the coordination of investigations covering an already identified area of noncompliance. One successful project dealing with the appraisers, inspectors and contractors working with the Federal Housing Authority was substantially completed this year. Since August 1972, when this investigation began, there have been 66 prosecution recommendations and the additional tax and penalties proposed exceed \$13 million dollars. Other recent and significant intelligence investigations have focused on foreign bank and brokerage accounts, nuclear power plant construction, corruption of public officials through payoffs and kickbacks, and tax return preparation.

During 1975, the Intelligence Division completed 8,731 investigations and recommended prosecution of 2,760 taxpayers. Grand juries indicted or courts filed informations on 1,495 taxpayers. Prosecution was successfully completed in 1,219 cases. In 1,046 cases taxpayers entered guilty pleas, and in 173 cases taxpayers were convicted after trial. Acquittals and dismissals totaled 83 and 168, respectively. Of the 1,202 taxpayers sentenced during 1975, 485 or 40.3 percent received jail sentences compared with 42 percent last year.

Cases Prosecuted

Tax fraud is not restricted to any particular occupational or social group but reaches across a wide spectrum of industries and occupations. The following examples illustrate only a few successful prosecutions resulting from the Service's vigorous and balanced program of investigating tax fraud:

A San Francisco Bay area resident was found guilty of income tax evasion and sentenced to five years in prison. The investigation revealed that he had failed to report \$128,000 in Irish Sweepstakes winnings, which he claimed in Dublin and deposited in a foreign bank account.

Two trials and eight guilty pleas resulted in the conviction of 10 Seattle residents who had filed false claims for refunds. The charges emanated from the filing of 13 fraudulent income tax returns using false Forms W-2. The individuals received sentences totaling 14 years.

A Philadelphia auto dealer and former city official was fined \$7,500 and placed on probation for five years for failing to report money embezzled from his business. Additional tax and penalties proposed by the IRS were about \$679,000.

A North Carolina school teacher was convicted of preparing false tax returns for others. The judge ordered the school teacher to deposit \$5,000 in a trust fund to assist his clients who were injured by his fraudulent acts.

A Texas insurance agent was sentenced to three years in prison for income tax evasion. He was convicted of failing to report more than \$130,000 received from a fraudulent scheme involving a life insurance company.

Three Wheeling, Illinois residents received fines ranging from \$3,000 to \$25,000 and up to four years in prison for failing to report income derived from payoffs extorted from building contractors.

A Georgia veterinarian was sentenced to three years in prison after pleading guilty to income tax evasion for the year 1967. The net worth method was used to determine his correct income for the years 1966 through 1969. Additional civil tax and penalties exceeded \$1 million.

Organized Crime and Strike Force Activities

The IRS cooperates in the Federal government's fight against organized crime by participating in the Federal Organized Crime and Strike Forces Program. Located in 17 major cities, these units are headed by Strike Force attorneys from the Justice Department. The objective of this program is to coordinate the combined forces of Federal law enforcement agencies against the criminal element in our society. The IRS is responsible for ensuring that income from illegal activities is correctly reported and taxed and for detecting criminal violations of the tax laws. During 1975, the IRS contributed 513 man-years of direct investigative and examination time to the Strike Force effort.

A total of 97 organized crime members and their associates were convicted or pleaded guilty to tax charges during the year and 650 prosecution cases were pending when the year ended.

Since the inception of the organized crime program in 1966, 539 organized crime members and associates have been convicted or have pleaded guilty to various tax charges.

The following are examples of Organized Crime and Strike Force activities:

During 1975, probes were conducted in many areas of illegal activities by the various Strike Forces to identify individuals who may have violated the tax laws. One of the most important areas in terms of total monetary value involves the fencing of stolen goods, ranging from small items, such as jewelry and gold, to large, bulky oil drilling equipment. Other areas of prime concern to the Strike Forces have been union racketeering and corruption and the investment of income from illegal activities in legitimate businesses and real estate developments.

A major Atlanta racketeer was convicted of tax evasion for the years 1967 through 1969 and was fined \$15,000 and sentenced to five years in prison.

In Los Angeles, an ex-IRS revenue agent and his business associate, an organized crime figure, were sentenced to four years and one year, respectively, upon conviction of income tax evasion for 1970. Total civil tax and penalties on the unreported income from the sale of bootleg eight-track tapes was nearly \$1.4 million.

A Seattle racketeer was sentenced to six months in prison for violations of the tax laws covering withheld income and social security taxes. His defense that he was merely making an "unauthorized loan" from the government was not found acceptable by the trial judge.

Narcotics Traffickers

Since 1971, the IRS has cooperated with other Federal, state and local law enforcement agencies in a concerted effort against narcotics traffickers. The IRS contribution to this effort involves the identification and investigation of middle and upper echelon traffickers and financiers who violate the Internal Revenue laws.

Consistent with the IRS policy to achieve maximum compliance with the revenue laws, the Service will continue to identify and investigate significant tax violations by traffickers and financiers.

During 1975, the IRS completed 398 criminal tax investigations, obtained 81 indictments and achieved 83 convictions of traffickers and financiers. The IRS collected more than \$3.8 million in narcotic trafficker assessments during 1975 and had property valued at \$4.5 million under levy and seizure at the end of the year.

The following are examples of the results of IRS narcotics traffickers investigations:

A convicted Hawaiian crime figure received a 24-year sentence, the most severe penalty thus far handed down by a Federal court for tax evasion.

A Miami narcotics trafficker was convicted of tax evasion for the years 1969 and 1970 and was sentenced to 3 years in prison. Additional tax and penalty figures proposed by the IRS exceeded \$38,000.

A Los Angeles narcotics wholesaler received prison sentences of six years for tax evasion and two years for his part in a conspiracy to violate the tax law.

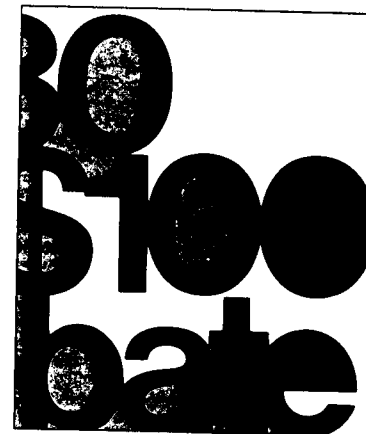

**Executive Order Limits Tax
Information Disclosure**

During 1975, attention was focused on the disclosure of tax information. While regulations issued by the Treasury Department and approved by the President pursuant to section 6103 of the Internal Revenue Code place strict limitations upon agency and public access to tax return information, there were no explicit legislative restrictions upon disclosure to the White House. On September 20, 1974, President Ford signed an Executive Order setting forth legally binding procedures whereby the President must personally sign all requests for copies or inspection of tax returns and must designate in writing the member of his staff who is authorized to see specifically identified returns on his behalf.

To insure that income tax return information is not disclosed improperly, present law provides for penalties of up to \$1,000 or imprisonment for one year, or both, for any unauthorized disclosures. The Service is constantly on guard against any unauthorized use of tax return information.

**Chapter 4
Technical Activities**

**Tax Rulings
and Technical Advice
Internal Revenue Bulletin
Accounting Methods Rulings**

Tax Rulings and Technical Advice

The Service's tax ruling program consists of letter rulings and published Revenue Rulings.

A letter ruling is a written statement issued to a taxpayer by the National Office interpreting and applying the tax laws to a specific set of facts. Such a ruling provides advice concerning the tax effects of a proposed transaction so that the taxpayer may structure the transaction to comply with the tax laws, thus resolving issues in advance and avoiding future controversy. Letter rulings are not precedents and may not be relied upon by other taxpayers.

A Revenue Ruling is an interpretation of the tax laws issued by the National Office and published in the Internal Revenue Bulletin for the information and guidance of taxpayers, practitioners and IRS personnel. Most Revenue Rulings are based on letter rulings which have the potential of setting precedents or have such broad applicability that general guidance should be offered to people in similar situations.

Technical advice is counsel or guidance as to the interpretation and proper application of the tax laws to a specific set of facts. It is furnished by the National Office at the request of a district office in connection with the audit of a taxpayer's return or claim for refund or credit. Frequently, the district director's request is made in response to the suggestion of the taxpayer that technical advice be sought.

Requests for Tax Rulings and Technical Advice (Closings) 1975

Subject	Total	Taxpayers' Requests	Field Requests
Total	24,236	23,596	640

Individual Income Tax Matters	2,691	2,574	117
Corporation Tax Matters	4,305	4,095	210

Test Program for Processing Ruling Requests

On July 1, 1974, the Service initiated a test program in the Reorganization and Excise Tax Branches, Office of the Assistant Commissioner (Technical), to change the processing of ruling requests. Under the test program, tax law specialists would, within seven work days after receipt of the request, contact the taxpayer or the taxpayer's representative to discuss informally the procedural and substantive issues involved in the ruling request.

The test program, initially conducted for a six-month period and later extended to June 30, 1975, proved to be feasible in the two branches and was very favorably received by taxpayers. A report urging continuation of the program was received from the American Bar Association.

On April 7, 1975, the Service announced in Rev. Proc. 75-23 that the test program had been extended to June 30, 1976, and expanded to include (with only a few exceptions) ruling requests received by all the ruling branches in Technical. Under the expanded test program, the taxpayer or the representative will be contacted within fifteen work days after receipt of the ruling request and informed of a tax law specialist's tentative conclusions concerning the ruling request.

Tax Credit for Purchase of Residence

Under the Tax Reduction Act of 1975, new Code Section 44 provides for a tax credit to taxpayers purchasing a new residence under certain conditions. Since this provision had no counterpart in previous tax law, the IRS promptly issued a Technical Information Release summarizing the provisions and the Service's interpretation of Section 44. From April to June, the National Office Technical organization received over 150 requests for written information in addition to 10-30 telephone calls per day.

Sick Pay Exclusion Clarified

Prior to April 1974, the IRS took the position that the sick pay exclusion under Section 105(d) of the Internal Revenue Code was applicable to disability pension payments only until the employee reached optional retirement age rather than mandatory retirement age. Optional retirement age was deemed to be the earliest age indicated in the pension plan at which the taxpayer could retire without the employer's consent and still receive retirement benefits based on service up to retirement computed at the full interest rate in the plan. After a number of adverse court decisions, the IRS announced in Technical Information Release 1283, on April 9, 1974, that taxpayers retired on disability prior to the mandatory retirement age could apply the sick pay exclusion to their disability payments.

During 1975, the Service received over 150 requests for rulings and information on specific plans that included the sick pay exclusion. Tax Regulations implementing the new procedures and superseding prior regulations were published in the Federal Register on April 14, 1975.

The weekly *Internal Revenue Bulletin* is the authoritative publication of the Commissioner for announcing official rulings and procedures of the Service and for publishing Treasury Decisions, Executive Orders, tax conventions, legislation, court decisions, and other items of general interest. *Bulletin* contents of a permanent nature are consolidated semiannually into *Cumulative Bulletins*. Copies of the weekly and semiannual issues are distributed within the Service and are made available to the public by the

Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, on a single copy or subscription basis.

During 1975, items in the *Bulletin* included 576 Revenue Rulings, 66 Revenue Procedures, 27 Public Laws relating to Internal Revenue matters and 31 committee reports, 3 Executive Orders, 42 Treasury Decisions containing new or amended regulations, 19 Delegation Orders, 3 Treasury Department Orders, 9 court decisions, 33 Notices of Suspension and Disbarment from Practice before the Service, and 181 Announcements of general interest.

The *Bulletin Index-Digest System*, revised as of December 31, 1974, provides a rapid and comprehensive means of researching material published in the *Internal Revenue Bulletin* after 1952. The major part of the System consists of digests of *Bulletin* items arranged under headings that facilitate a topical approach to a search for items on a specific issue. With the aid of finding lists, the researcher can locate items by Code section or number.

Internal Revenue Bulletin

**Accounting
Methods
Rulings**

During 1975, a sudden increase was experienced in requests for rulings regarding accounting methods. The increase occurred principally in two areas.

First, many taxpayers requested permission to adopt or readopt the last-in first-out (LIFO) method of inventorying their goods. The LIFO method softens the impact of inflationary trends on prices paid for goods and, in effect, reduces or defers taxpayers' current profits and taxes. The increase in requests for permission to adopt the LIFO method is expected to continue until the present inflationary spiral levels off or reverses.

Second, there were increases in the number of requests by manufacturers to change to the full absorption method for inventory valuation. This activity was primarily a result of the promulgation in 1973 of section 1.471-11 of the Income Tax Regulations, which provided a transition period for manufacturers to change to the full absorption method for inventory valuation.

Chapter 5**Employee Plans and
Exempt Organizations****Employee Plans
Exempt Organizations
Actuarial Matters**

Employee Plans and Exempt Organizations

To administer the Employee Retirement Income Security Act of 1974 (ERISA), the IRS established on December 2, 1974 an Office of Employee Plans and Exempt Organizations (EP/EO) headed by an Assistant Commissioner, the first created by statute. The purpose of ERISA is not to raise revenue, but rather to protect the retirement income security of some 30 million American workers. It also required major changes in the private pension field and had an impact comparable to the initial Social Security Act of 1935. ERISA was the most significant change in the Federal taxing provisions since the Tax Reform Act of 1969.

The new office is responsible for carrying out regulatory responsibilities assigned to the Service with respect to employee benefit plans as well as to tax exempt organizations. In the National Office, the new structure consists of Employee Plans, Exempt Organizations, and Actuarial Divisions, achieved by a transfer of functions from the Audit and Technical organizations. EP/EO field staff are located primarily in 7 regional offices and 19 key districts, and local service is provided in numerous other offices.

Employee Plans

Regulations have been developed to administer employee plans in accordance with the new law. Major emphasis has been placed on those regulations most urgently needed by taxpayers.

To insure that taxpayers receive consistent information on rulings and are not required to make duplicate reports, the IRS established liaison with the Department of Labor and the Pension Benefit Guaranty Corporation through a policy committee, an ERISA coordination board, and a joint interagency regulations drafting group.

From September 2, 1974 to the end of FY 1975, 12 regulations, 10 revenue rulings, 7 revenue procedures, 6 delegation orders, 22 technical information releases, 12 forms, 6 news releases and 1 publication were issued in the employee plans area. Fact sheets on the most common questions and answers were also developed for taxpayer assistance personnel.

The Employee Retirement Income Security Act requires the conformance of all new pension benefit plans, approximately 500,000 existing corporate plans, and an estimated 400,000 existing self-employed plans.

In 1975, the Service devoted an average of 555 field professional positions to carrying out its regulatory responsibility in the employee benefit plans area.

This responsibility is met by issuing advance determination letters regarding the qualification of pension, profit-sharing and other employee benefit plans and by conducting an examination program to determine whether plans continue to qualify in operation and to verify the appropriateness of deductions for plan contributions. The number of determination letters issued with respect to corporate pension and profit-sharing plans during 1975 was 70,818, a decrease of 17.7 percent from 1974. The decrease is attributed to the passage of ERISA and the fact that the IRS was in the process of developing regulations under the new law.

Preparations have been made for a case inventory control and management information reports system with computer terminals in all key districts and certain associate districts. This will enable IRS to control applications for approval of plans and plan amendments.

Exempt Organizations

During 1975, the Service received 42,411 applications and reapplications from organizations seeking a determination of their tax exempt status or seeking a determination of the effect of organizational or operational change on their status. The Service issued 34,203 determinations and ruling letters. In addition, 368 technical advice memoranda were issued. The Service devoted an average of 495 field professional positions to the examination of the returns of 22,168 exempt organizations.

Also, 1 regulation, 50 revenue rulings, 5 delegation orders, 8 forms, 4 news releases and 2 publications were issued in 1975. Question and answer sheets were also prepared for taxpayer service use on exempt organizations.

In 1975, the Service met its commitment to the Congress to examine all private foundations within a 5-year audit cycle which ended December 31, 1974.

A Taxpayer Compliance Measurement Program (TCMP) covering the examination of private foundations, public charities and social welfare organizations was initiated in 1975. The program is designed to identify patterns and characteristics of compliance and noncompliance of the exempt organizations being studied.

The number of active entities recorded on the Exempt Organizations Master File (EOMF) increased from 673,000 in 1974 to 692,000 in 1975.

As of July 1, 1975, the EOMF was redesigned to include additional data from returns to provide information to the Congress, the charitable community and the Service.

A revised Cumulative List (Publication 78) of charitable organizations described in Section 170(c) of the Internal Revenue Code was published in 1975. This publication, now issued annually with Cumulative Quarterly Supplements, identifies those organizations with outstanding ruling or determination letters holding that contributions to them are deductible.

A proposed Revenue Procedure concerning guidelines and recordkeeping requirements for private schools was published in the *Federal Register* for public comment. The public responses have been evaluated and will be incorporated into the final Revenue Procedure. A Revenue Ruling concerning the IRS position on church-related schools practicing racial or ethnic discrimination was also announced.

Three Revenue Rulings and a Revenue Procedure were published covering the tax exempt status of public interest law firms and the acceptance of legal fees by such firms.

Actuarial Matters

In 1975, the Service devoted 17 average positions to reviewing actuarial determinations, interpreting and clarifying provisions under ERISA, and overseeing the enrollment of actuaries to practice before the Internal Revenue Service.

The Joint Board for the Enrollment of Actuaries developed final regulations for enrollment which provide for examinations of applicants in all 58 Districts in a manner similar to the examination for enrollment to practice before the Internal Revenue Service. Enrollment on the basis of professional standing and experience is also provided.

Publication 861, *Annuity Factors for Lump-Sum Distribution*, was issued in 1975.

International Programs

**Tax
Administration
Abroad**

**Technical
Assistance
to Foreign
Countries**

Tax Administration Abroad

The Service maintains a system of permanent foreign posts to help coordinate its domestic and foreign tax programs. Revenue Service Representatives (RSRs) at these stations are involved in compliance and taxpayer assistance activities and maintain cooperative contacts with foreign tax agencies. Foreign operations of the IRS are the responsibility of the Office of International Operations (OIO).

The five new OIO posts authorized in 1974 are now fully operational. They are located in the U.S. embassies or consulates in the following cities: Canberra, Australia; Caracas, Venezuela; Johannesburg, South Africa; Kuala Lumpur, Malaysia and Teheran, Iran. These posts reinforce those already established in Bonn, London, Manila, Mexico City, Ottawa, Paris, Rome, Sao Paulo and Tokyo. In addition to the new posts, the staffs at several of the older locations were increased. This expansion program should significantly improve the Service's overseas operation by permitting a more intensified and efficient coverage of each post area.

Assistant Commissioner (Compliance) S. B. Wolfe presents superior performance award to Linda Harris for her work with the overseas audit

To increase the foreign language proficiency of RSRs, training facilities of the State Department are used. In addition, the OIO maintains its own language laboratory, which in 1975 offered courses in conversational French and German. An expanded program is under development to provide in-housing training in Spanish and Italian as well as for personnel who are sent abroad on temporary assignments.

OIO conducted its annual Overseas Taxpayer Assistance Program in 1975 for the twenty-second consecutive year. A taxpayer service representative (TSR) was detailed to each of the OIO foreign offices to counsel taxpayers during the extended overseas filing period of January through June. Also, other "circuit riding" TSRs covered an additional 105 cities in 59 countries.

program during an assignment to the IRS foreign office in Rome, Italy.

Together with other IRS personnel, these specially trained representatives gave information and guidance to approximately 93,000 taxpayers overseas during the first six months of 1975, an all-time record in number of taxpayers assisted. In addition, several days of tax instruction were provided to members of the Armed Services at foreign bases, who were then able to help thousands of overseas military personnel prepare their returns.

Compliance Overseas

In 1975, the Service continued its overseas audit program to encourage a level of compliance among Americans abroad which will compare more favorably with the high degree of voluntary compliance in the United States. Under this program, revenue agents and tax auditors are detailed on six-month tours to the Service's foreign offices where they conduct both field and office audits, working together with the RSRs stationed overseas.

For the second consecutive year, revenue officers were also detailed to several foreign areas to collect tax payments and secure returns from delinquent taxpayers.

The majority of OIO audits and collections still take place within the United States. An important phase of this activity is designed to ensure tax compliance by foreign corporations doing business in this country. A growing counterpart program is represented by "support" audits, through which OIO renders assistance to district offices by examining foreign subsidiaries of U.S. corporations.

Resolution of Tax Jurisdiction Problems

In 1972, the Congress enacted legislation providing for jurisdictional coordination between the U.S. and the Territory of Guam on individual income tax payments. Taxpayers may now file and pay tax to only one of the two jurisdictions, depending on their place of residence at the end of the taxable year. The IRS and the Guam territorial government have cooperated closely in determining if taxpayers have filed erro-

neously under the new rules, and in resolving accounts between the two jurisdictions.

An active on-site audit program was conducted to determine the extent of compliance in the employment tax area by employers in all U.S. possessions. This program has resulted in increased taxpayer awareness of the filing requirements and improved compliance.

Competent Authority Cases

The interactions of U.S. and foreign tax systems inevitably generate such problems as double taxation. To provide relief to taxpayers in these situations, tax treaties include procedures for settlement of international tax issues by "competent authorities" of the signatory countries. During recent years, there has been a continuing increase in taxpayer requests for competent authority assistance. The U.S. competent authority, the Assistant Commissioner (Compliance), and his foreign counterparts have successfully resolved most of the problems which prompted these requests. In the past five years, U.S. and foreign adjustments to taxpayer income to provide relief through settlement procedures have totaled more than \$110 million. Also, the time required to process most of these requests has been reduced by approximately 50 percent through improved case management techniques.

Exchange of Information

Effective administration of U.S. tax laws as to multinational corporations and other U.S. taxpayers engaged in international operations has required increased cooperation under our tax treaties. The IRS has continued to fulfill its reciprocal obligations specified in the treaties and has encouraged the appropriate use of the provisions for mutual exchange of information.

Technical Assistance to Foreign Countries

The IRS Tax Administration Advisory Services Division assigns tax advisors upon request by developing countries to help them modernize their tax administration systems. During 1975, 35 IRS employees performed such overseas assignments. Full-time advisors were assigned to eight countries—Bolivia, Columbia, Guatemala, Paraguay, Uruguay, Trinidad & Tobago, Viet Nam and Liberia. Short-term assistance in specific functions was provided to the Governments of Guyana, El Salvador and Ethiopia, while broad tax administration surveys were conducted for the Governments of Egypt and Portugal.

Tax officials from foreign countries visit IRS facilities for observation, to discuss problems in tax administration and for training. During 1975, 284 officials from 72 countries made such visits. Nearly 4,000 officials from 118 countries have visited the IRS during the past 13 years.

The Manhattan District hosts many foreign visitors each year. During October 1974, four members of Great Britain's Board of Inland Revenue visited the district to discuss the use of automatic data processing in audit and collection functions. From left, the photo shows Ralph Alexander Hamilton, Inspector of Taxes, Arthur

The Commissioner of Internal Revenue is a member of the Inter-American Center of Tax Administrators (CIAT), which has representation from 26 countries of the Western Hemisphere. The purpose of CIAT is to improve tax administration within the Western Hemisphere through the cooperative efforts of member countries. The Commissioner led the U.S. delegation to the Ninth annual CIAT Assembly in Ottawa, Canada in June 1975.

Robert Brunson, Senior Inspector of Taxes, William Scotland Rankin, Principal Inspector of Taxes, and Ian Douglas Thomson, Senior Principal Inspector of Taxes, being greeted by Manhattan District Director Philip E. Coates and Assistant District Director George S. Alberts.

Chapter 7 Legal Activities

Responsibilities of the Chief Counsel

Litigation

Technical

Administration

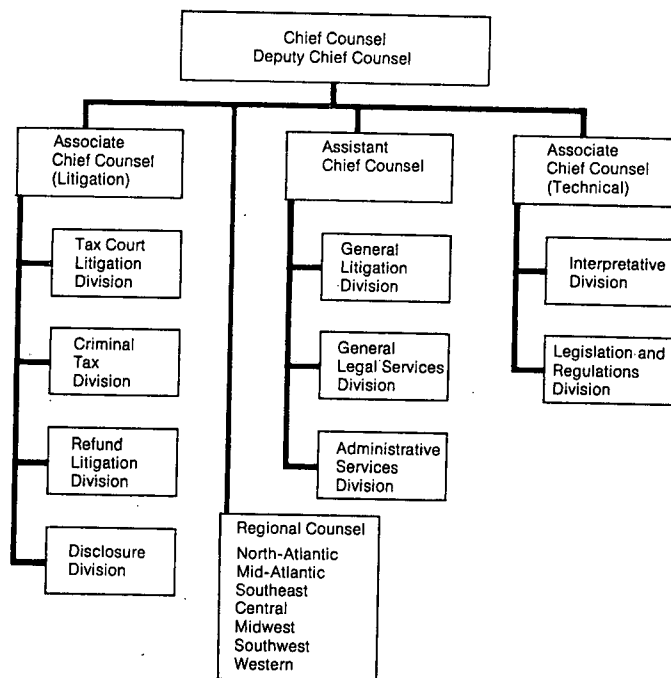

Responsibilities of the Chief Counsel

The Chief Counsel is the chief legal officer for the Internal Revenue Service and is a member of the Commissioner's executive staff. He advises the Commissioner on all matters pertaining to the administration and enforcement of the internal revenue laws and related statutes, as well as on all non-tax legal questions.

His advisory responsibilities are divided into two major areas: litigation and technical.

Organization

The Office of the Chief Counsel is organized as follows:

Tax Court, General Litigation, Criminal Tax, and General Legal Services have field counterparts. Refund Litigation, Disclosure, Interpretative, Legislation and Regulations, and Administrative Services do not.

Litigation

Both the National Office and the field offices are actively involved in litigation. Tax Court, General Litigation, Criminal Tax, and General Legal Services work is handled in the field offices subject to the overall direction of the National Office. Refund Litigation and Disclosure activities are centralized in the National Office.

Tax Court

One of the major responsibilities of the Office of Chief Counsel is the representation of the Commissioner of Internal Revenue in all actions brought in the United States Tax Court. One of the most significant events affecting Tax Court litigation during 1975 was the enactment of the Employee Retirement Income Security Act of 1974, which confers jurisdiction upon the Tax Court as of September 2, 1975 to render declaratory judgments with respect to qualification of retirement plans. On June 18, 1975, the Tax Court issued its rules applicable to actions for declaratory judgments, effective September 2, 1975.

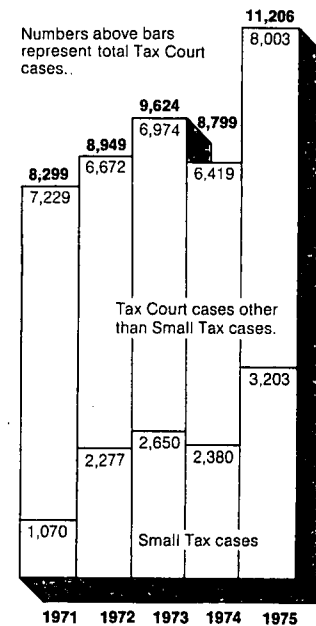

Refund Litigation

The Refund Litigation Division performs all necessary legal services on behalf of the Internal Revenue Service in connection with suits instituted in the United States District Courts and the Court of Claims by taxpayers for refunds of taxes. The Division determines and coordinates the legal position of the Service in these suits and incorporates such determinations in recommendations to the Department of Justice, which handles the trials of such cases.

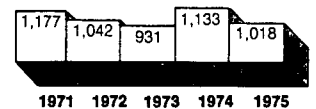

One of the most significant matters handled by the Refund Litigation Division during 1975 involved motion picture investment credit. The principal issue in this area concerns the validity of Treas. Reg. § 1.48-1(f), which provides that motion picture production costs are not eligible for the investment credit. While pending cases involve only the motion picture and television industries, the issue could have wide significance in the recording, book publishing and similar industries.

Tax Court Cases Received 1971-1975

Numbers above bars represent total Tax Court cases.

¹ Includes both small tax cases and others.

² Disposals include cases tried, settled, and dismissed. Some of the determined amounts are for cases which were subsequently appealed.

³ Amount Determined expressed as percentage of Amount Asserted or Claimed. These amounts do not include proposed assessments which are agreed to by the taxpayer at District or Appellate conferences. In the case of a claimed overpayment, the Recovery Rates shown above represent the portion of the amount in dispute which was refunded to the taxpayer.

⁴ Revised.

General Litigation

National Office and field office attorneys in the General Litigation area furnish legal advice to the Internal Revenue Service in connection with the assessment and collection of federal taxes and assist the Department of Justice in the prosecution and defense of suits to collect taxes, suits to recover erroneous refunds, proceedings under the Bankruptcy Act and other insolvencies, civil enforcement of summonses, and injunction and declaratory judgment actions. During 1975 the number of Bankruptcy Act proceedings handled by General Litigation attorneys, especially Arrangements under Chapter XI of the Act, increased substantially.

A major issue in the General Litigation area during 1975 concerned the use of "John Doe" summonses by the Service in tax investigations. In *United States v. Bisceglia*, 420 U.S. 141 (1975), the Supreme Court

held that the Service has authority to issue a "John Doe" summons to compel production of a bank's records relating to transactions with unknown persons which suggest the possibility of liability for unpaid taxes. In *United States v. Humble Oil & Refining Co.*, 421 U.S. 943 (1975), which involved enforcement of a summons to compel a company to turn over certain data concerning leases with unidentified lessors, the Court vacated the judgment and remanded the case to the Fifth Circuit for further consideration in light of its decision in *Bisceglia*. The Fifth Circuit on remand determined that the facts in this case did not warrant enforcement of a "John Doe" summons. *United States v. Humble Oil & Refining Co.*, 518 F.2d 747 (5th Cir. 1975). The Service has publicly stated that the authority to issue "John Doe" summonses will be used only in limited and justifiable circumstances.

¹ Now handled in the Disclosure Division.
² Includes Railroad Reorganizations and Actions for Injunctions and/or Declaratory Relief.

Disclosure

Attorneys in the Disclosure Division handle matters arising under the Freedom of Information Act, as well as requests for disclosure of documents and testimony in both tax and non-tax litigation. The Division is also responsible for providing legal advice to the Service concerning implementation of the Privacy Act of 1974, effective September 27, 1975.

Specifically, the Division is responsible for planning, directing and coordinating for the Internal Revenue Service all matters relating to requests for testimony and production of Internal Revenue documents, records or information under the Federal Rules of Civil or Criminal Procedure, the Tax Court Rules, the Court of Claims Rules and various State court rules. This Division works closely with the Disclosure Staff of the Internal Revenue Service. It also coordinates with the Department of Justice all litigation arising under the Freedom of Information Act, including recommendations about defense or settlement of suits and appeals of adverse decisions.

During 1975, the Division was extensively involved in the vital question of the publication of private letter rulings and technical advice memoranda.

Tax Analysts and Advocates filed suit in April 1975 in the District Court for the District of Columbia seeking all letter rulings issued since the effective date of the Freedom of

Information Act, subject only to deletions of trade secrets, confidential commercial or financial information, or clearly unwarranted invasions of privacy. Persons who have received unpublished letter rulings were advised in a news release issued by the Service that the above action had been commenced and they could take whatever action or make whatever comment they felt appropriate. Earlier, the D.C. Circuit held in *Tax Analysis and Advocates v. Internal Revenue Service*, 505 F.2d 350 (D.C. Cir. 1974), that the Service had to disclose certain requested letter rulings under the Freedom of Information Act, but did not have to disclose technical advice memoranda. In *Fruehauf Corporation v. Internal Revenue Service*, 522 F.2d 284 (6th Cir. 1975), the Sixth Circuit determined that private excise tax rulings-letters were subject to disclosure, and technical advice memoranda as a category are not covered by Code § 6103 as tax return information. A petition for rehearing on this latter point was denied. A petition for certiorari was filed on November 6, 1975. The Service's position remains that technical advice memoranda are tax return information not subject to disclosure under the Freedom of Information Act.

In December 1974, the Commissioner announced a notice of proposed rule making which would authorize the prospective disclosure of future rulings and determination letters issued by the Internal Revenue Service. A public hearing on the proposed provision was held in March 1975.

Criminal Tax

National Office and field office attorneys in the Criminal Tax area handle all criminal tax legal matters for the Internal Revenue Service, coordinate criminal tax prosecutions with the Department of Justice, assist the Tax Court and Refund Litigation Divisions in coordinating the application of the civil fraud penalties, and coordinate disclosure matters in cases where criminal action is anticipated or has been undertaken.

During 1975, Criminal Tax attorneys furnished an increasing amount of legal advice to criminal investigators in the Internal Revenue Service's Intelligence Division during the investigative stage of criminal tax cases. In addition, decentralization of criminal tax work to regional and branch offices resulted in a steady increase in pre-referral assistance to the Intelligence Division, and resulted in a more efficient use of manpower in criminal tax investigations.

General Legal Services

The General Legal Services Division was established on July 21, 1974 to handle the increasing volume of legal matters arising in the non-tax legal area. These matters were formerly handled by the General Legal Branch of the Operations and Planning Division, which was abolished on the same date.

Attorneys in the General Legal Services function in the National Office and the field offices represent the Service in labor cases, including representation hearings, impasse proceedings, unfair labor practices, and arbitration hearings, and serve as counsel to and a member of management teams negotiating individual and multi-unit labor agreements. In addition, the attorneys represent the Service in adverse action and discrimination proceedings, represent the Director of Practice, Office of the Secretary of the Treasury, in disciplinary actions brought against tax practitioners, and provide on-going advice to the Service concerning government contracts, tort claims, forfeitures, Inspection Service matters, and other areas not directly related to Federal tax matters. The most significant event affecting the General Legal Services function during 1975 was the decentralization of the function, so that advice in non-tax legal areas will be readily available to the Service both in the National Office and in the field offices.

General Legal Cases Received 1971-1975

Technical

The two technical divisions of the Office of Chief Counsel—Interpretative and Legislation and Regulations—are located in the National Office.

Interpretative

The Interpretative Division provides legal assistance to the Office of Assistant Commissioner (Technical) and the Office of Assistant Commissioner (Employee Plans and Exempt Organizations) in the issuance of letter rulings, technical advice, revenue rulings and revenue procedures. The Division also provides legal assistance to other Divisions in the Chief Counsel's Office in determining litigating positions and in coordinating the litigating positions with the ruling positions of the Service. The Interpretative Division was reorganized in 1975 by the creation of an additional Assistant Director, who will be responsible for the general supervision of the legal work received by the Division concerning employee plans or exempt organizations.

Interpretative Division Cases Received 1971-1975

Type of Case	1971	1972	1973	1974	1975

Legislation and Regulations Division Cases Received 1971-1975

Type of Case	1971	1972	1973	1974	1975
Legislation	24	76	46	77	85
Regulations	99	110	90	56	171
Miscellaneous	22	19	38	43	33
Total	145	205	174	176	289

Legislation and Regulations

The Legislation and Regulations Division represents the Commissioner and the Service in tax legislative matters. Division attorneys also provide the Treasury Department's Assistant Secretary for Tax Policy with technical assistance and expertise in the development and drafting of internal revenue legislation and furnish assistance to Congressional committees in the drafting of committee reports on tax legislation.

Attorneys in the Legislation and Regulations Division are responsible for drafting proposed regulations, drafting Executive Orders, and for representing the Service in negotiating and drafting tax treaties with foreign governments. Working closely with Service officials, attorneys in this Division prepare and review tax forms and instructions, hold hearings on proposed regulations, evaluate suggestions by Service personnel for regulatory changes, and review publications issued for the information and guidance of taxpayers and Service officials.

During 1975, The Division established over 50 regulation projects to implement the Employee Retirement Income Security Act of 1974 (P.L. 93-406), approved Sept. 2, 1974. A substantial number of these projects were published either as proposed or temporary regulations during this past year, including regulations dealing with specific problem areas under the new minimum participation, vesting, and funding standards of Code §§ 410, 411, and 412 applicable to qualified plans; individual retirement accounts, annuities, and bonds; lump-sum treatment of distributions from qualified plans; "H.R. 10" plans covering self-employed individuals; and declaratory judgment procedures established for qualified plans under Code § 7476.

Administration

The Administrative Services Division is responsible for the general supervision of all matters relating to administration and management in the Office of Chief Counsel. The Division is also responsible for the attorney recruitment program of the office.

Under the aegis of the Division, an Equal Employment Opportunity Advisory Committee, composed of representatives from each division in the National Office, assists in the administration of the Chief Counsel's Equal Employment Opportunity Program. The Office has made substantial progress in achieving its stated objectives and goals under the Affirmative Action Plan during this past year. In addition, the Federal Women's Program Advisory Committee participated with the Commissioner's committees in the observance of International Women's Year with a series of monthly programs on new legislation and legal rights of particular concern to women.

During FY 1975, the Administrative Services Division completed testing a computerized legal research system, Technical Reference Information System, and is making plans for the installation of the system.

Chapter 8

Planning and Research

Planning Activities
Research and Testing
Legislative Activities
Federal-State Cooperation
Statistical Activities

Planning Activities

Planning activities of the Service during 1975 concentrated on the design and testing of improved automation systems, analysis of pending legislation, and statistical compilation and projection of tax return data. Long-range planning of workloads and resources and measurement of progress in meeting program objectives continued as central features of planning activities.

Tax Administration System

Plans for a redesigned IRS data processing framework—the Tax Administration System—were completed by the Tax Systems Redesign Division and, after pending Congressional approval, a solicitation document will be released to equipment manufacturers. The redesigned system was developed to improve service to the public, including the processing of tax returns and the retrieval of information related to those returns, to provide increased capability for compliance and enforcement programs, and to enable the Service to accommodate changes effectively and overcome the inefficiencies of the old system.

To accomplish the Tax Administration System objectives, the taxpayer account files at the National Computer Center in Martinsburg, West Virginia, will be decentralized to the ten IRS service centers; the National Computer Center, in turn, will assume the new role of controlling activities between the service centers and maintaining a directory of service center records so that an account is not kept on file at more than one service center.

Implementation of the redesign plans will be of such magnitude that it will take place in phases. The major phase, planned to begin in the initial service center in late 1979 and to be implemented nationwide over the next year, will consist of converting the individual master file accounts to the Tax Administration System. All phases are expected to be operational in all service centers for the 1982 filing season.

Optical Character Recognition

Recent technological advances in Optical Character Recognition (OCR) development indicate that OCR will probably be more economical than manual transcription. The Service plans to test this hypothesis in two areas: (1) converting to magnetic tape the data reported by taxpayers on information returns such as payments of wages, dividends and interest, or adjustments to income, and (2) conversion of data recorded on Federal Tax Deposit forms (FTD's), and other forms with print characteristics controlled by Service preparation, such as internal management documents, turn around documents, management information data, and others.

Research and Testing

Automatic Document Numbering

The IRS annually processes millions of paper documents, many of which are manually numbered to facilitate control. We now plan to conduct a test of Automatic Document Numbering machines in one service center. We expect these machines to be capable of automatically feeding, numbering, and sequentially stacking tax returns as received from taxpayers, therefore having the potential for eliminating current manual numbering activity and expediting the flow of returns processing. Subsequent tests will determine the feasibility of computer-controlled numbering.

Remittance Processing System (RPS)

Successful tests were made with a prototype computerized system to expedite clearance and deposit of tax remittances. Combined remittance data input, numbering and preparation of accounting documents are included in a single operation. The RPS will reduce processing costs, accelerate remittance posting to account status and tax data bases, and provide a "fact of filing" indicator for account status operations.

Technical Reference Information

Testing was successfully completed on a Technical Reference Information (TRI) system. Under the control of a large scale computer, the TRI applies computer techniques to help resolve legal research problems of the IRS. Researchers query the TRI system, which contains the current Internal Revenue Code and Regulations, Revenue Rulings since 1954 and selected tax cases from the various courts, via interactive video terminals for material relevant to various tax issues. Fifteen video terminals are currently installed in large IRS offices and we plan gradual expansion to other offices.

Statistical Sampling

A system is being developed to provide revenue agents with computer-generated sampling plans. This will reduce the amount of time needed to complete many large corporate examinations because only a fraction of the voluminous records which previously would receive individual scrutiny will now require such action. Instead, a probability sample of these records will be selected through the use of programmed random number generators. The results of these sample examinations will be evaluated in terms of established statistical principles.

Restructure of the Planning and Research Activity

Recognition of the necessity for a very close relationship between research efforts and the analysis of operations resulted in the restructure of the Office of Planning and Research. All Servicewide research and operations analysis functions were assigned to a new Research and Operations Analysis Division. Since applications of automated systems are closely related to these efforts, the functions of the former Systems Development Division were also assigned to the new Division. Another facet of the restructure was organizational identification of the increasing responsibilities associated with drafting of legislation related to the administration of the Internal Revenue Code. This was accomplished by establishment of the Legislative Analysis Division.

Legislative Activities

Pension Reform

Landmark legislation on pension reform, the Employee Retirement Income Security Act of 1974, was enacted during the second session of the 93rd Congress. Under the Act, the Service established an Office of Employee Plans and Exempt Organizations (EP/EO) with national and field office functions under an Assistant Commissioner. (See Chapter 5, page 40, for EP/EO activities)

Tax Reduction Act

The Tax Reduction Act of 1975 was enacted during the early part of the 94th Congress and required rapid response from the Service in implementation of a program to compute and issue rebates, revision of withholding tax tables, distribution of a new Circular E, and dissemination of information on other features of the law. Provisions of the Act made it necessary to revise a large number of taxpayer publications, tax regulations, returns, transcription instructions, and computer programs.

Freedom of Information Act Amendments and Rights to Privacy

Significant non-tax legislation affecting the IRS included the Freedom of Information Act Amendments and the Privacy Act of 1974. The FOI amendments impose strict time limitations within which an agency must act on information requests, and restrict the information which may be withheld. The Privacy Act imposes conditions under which disclosures may be made, establishes notice and recordkeeping requirements relating to disclosures, establishes procedures by which an individual may inspect and request amendment of records pertaining to himself, and provides civil remedies and criminal penalties for violations.

Tax Reform

During the 93rd Congress, extensive hearings were conducted by the House Ways and Means Committee on a proposed Tax Reform Act of 1974. The Committee reached tentative decisions on proposals which would have resulted in a large-scale revision of the Code, but a bill was not reported out. The IRS maintained close liaison with the tax writing committees of the Congress and assisted the Office of the Secretary in preparing a number of legislative proposals for tax simplification and reduction of administrative problems in enforcing current tax laws.

Confidentiality of Tax Returns

Numerous bills were introduced in the 93rd and 94th Congresses which would restrict the disclosure of tax returns and tax return information permitted under the Internal Revenue Code. The main thrust of these bills was to prescribe by statute the persons to whom and the purpose for which disclosure of such information may be made and to establish tighter rules and safeguards to insure the confidentiality of tax returns and tax data.

Energy Legislation

The Congress is actively considering energy legislation which will provide for new taxes and credits to encourage energy conservation. Provisions under consideration would have a substantial impact on Service operations.

Single Wage Reporting System

The Secretary of the Treasury has approved a draft bill which, if enacted, would provide for the combined annual reporting of wages on Form W-2, Wage and Tax Statement, to serve the needs of the Social Security Administration in determining social security program coverage and benefits as well as the IRS for tax enforcement. This system would benefit both employers and the Federal government through a substantial reduction in the volume of required wage reports. The IRS has long urged this reduction in the U.S. paperwork burden.

Other Legislative Developments

In addition to the laws on pension reform, freedom of information, and rights to privacy, 16 other public laws enacted during the second session of the 93rd Congress required implementing action by the IRS. Among significant laws passed were those dealing with tax relief for U.S. personnel who served in Vietnam and their families, an increase in interest rates applicable to refunds and delinquencies, and IRS assistance in locating absent parents and collecting court-ordered payments for child support.

Federal-State Cooperation

Aid to State Tax Authorities

Under the Intergovernmental Personnel Act, IRS employees have helped state-tax authorities improve their programs and have contributed to increased cooperation between the IRS and state tax authorities. In 1975, the IRS provided almost 160 weeks of training assistance to 17 state and local governments. State revenue employees received training in special agent, revenue agent and income tax law courses. IRS instructor training courses have enabled the governments of New York State and the city of Philadelphia to develop training courses which will meet the future needs of their tax department employees.

Federal-State Exchange Program

The Service has formal agreements which provide for reciprocal exchange of tax information with 48 states, the District of Columbia, Puerto Rico, Guam, and American Samoa. A revised model agreement was designed to tighten up the language on disclosure of tax return information, and some states have already signed agreements conforming to the revised model.

Magnetic tapes containing standard data elements extracted from the Individual Master File for tax year 1973 were furnished to tax authorities in 38 states, the District of Columbia, and Puerto Rico. Also available to state tax agencies are magnetic tape extracts of information from the Business Master File and Service master files relating to gift taxes and exempt organizations.

Federal Collection of State Individual Income Taxes

No state has elected to have the Federal government collect individual state income taxes as authorized by the Federal-State Tax Collection Act of 1972, but in anticipation of such possible election by states, the IRS has completed preliminary plans for tax withholding and operating procedures.

Statistical Activities

Statistics of Income Highlights

The Statistics of Income (SOI) reports provide the public and the Government with a wide variety of data reported on income tax returns, without violating taxpayers' rights to privacy. The estimates are based on representative samples of returns.

SOI reports published in 1975 covered individual, corporation, and business income tax returns for 1972. The latter two were preliminary reports. All of these reports are issued annually.

Also in 1975, after an interval of some years, the IRS published an SOI report on estate tax returns. This report is based on Federal estate tax returns filed in 1973 for decedents (most of whom died in 1972). Work also began on the first of a projected series of statistical reports covering tax-exempt organizations, the first of which is expected to cover compensation plans, farmers' cooperatives, and other exempt organizations including charities, schools, and associations.

Statistics of Income publications can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Tax Models

Originally developed over 10 years ago to meet Treasury's need for timely estimates of the revenue effects of proposed tax legislation, the tax models continue to be valuable tools for economic planning. Five basic models, representing the returns of individuals, corporations, proprietorships, partnerships, and estates, are now used.

Each model consists of a set of generalized computer programs used with specially structured data files comprising records in the Statistics of Income files. Statistical information is generated from a model file by using instruction cards designed by statisticians and economists.

In addition to the basic tax model for individual returns, the Service developed, in connection with the Federal-State Tax Collection Act of 1972, a special individual model set, "State Tax Models." These models are designed to permit reliable data estimates for each of the 50 states and the District of Columbia. Toward this end, the models are

based on the full Statistics of Income sample (over 235,000 returns for 1973) instead of the subsample of about 100,000 returns used for the basic model.

Returns Filed Projections

Projections of the number of returns to be filed serve as the basis for the development of the Service's plans for the allocation of manpower and facilities as well as budget requests. These workload projections are prepared for the United States as well as for service center areas, regions, and districts. Statistical techniques are used to identify the relationship between tax returns filed and economic and demographic variables. Annual updating allows for the incorporation of the most recent economic outlook as well as allowing the incorporation of the effects of tax law changes.

The total number of returns filed in 1975 was about 3 million higher than in 1974. An additional increase of 3 million more returns is expected in 1976. Much of the anticipated 1976 increase can be attributed to the Earned Income Credit provisions which the Tax Reduction Act of 1975 made effective for that filing year only. Between 1977 and 1980, returns are expected to increase at an annual rate of 2.3 percent and at an annual rate of about 2 percent between 1980 and 1985.

The trend toward more complex returns is also expected to continue. Individual returns with adjusted gross income of \$10,000 and over are expected almost to double between 1974-85. Fiduciary, estate, gift, exempt organization, and employee plan returns are also expected to increase rapidly.

Projections of some major categories of returns are shown in the following table.

Selected Types of Returns Filed in 1974, and Projected for 1975, 1976, 1980 and 1985, By Calendar Year
(Thousands)

Type of return	Actual 1974	Esti- mated 1975	Projected			Percent change 1974- 1985
			1976	1980	1985	
	(1)	(2)	(3)	(4)	(5)	(6)
Total returns	122,082	125,020	128,107	137,838	151,480	25.1

Chapter 9**Internal
Management
of IRS**

**Maintaining Integrity and
Efficiency
Management and
Administration
Advisory Groups**

Maintaining Integrity and Efficiency

Internal audit and security programs of the Inspection Service help IRS managers maintain the highest levels of integrity and efficiency.

Internal Audit Activities

The Internal Audit Division independently reviews all IRS activities to ensure that policies, procedures, and controls protect taxpayer rights and the revenue, and that Service operations are carried out efficiently, effectively, and in accordance with laws and regulations. Varied auditing techniques, including computer analyses and statistical sampling, are used to detect operating problems and integrity breakdowns.

Savings and Improvements

Management actions resulting from internal audit reports have improved service to taxpayers, increased operating efficiency, strengthened internal controls, and stimulated an attitude of integrity awareness within the Service. In addition, measurable savings and additional revenue resulting from Internal Audit activities in 1975 are estimated to exceed \$32 million.

Corrective actions on some internal audit findings do not result in measurable savings or additional revenue, but instead accelerate the collection of taxes or otherwise improve Service operations and procedures. Management actions to accelerate the collection of taxes were taken on accounts and returns estimated to total \$17 million.

Disclosure Safeguards

Periodic reviews are made in all regions to evaluate security and controls over Federal tax data. As a result of these reviews in 1975, Service managers took action to strengthen the security and controls over the computerized Integrated Data Retrieval System and the tax document files. Also, actions were taken to strengthen the procedures and practices for exchanging tax data with the states.

Fraud, Embezzlement or Misconduct

One of the basic purposes of the Internal Audit program is to detect fraud, embezzlement, or other wrongdoing on the part of Service employees or others who attempt to corrupt employees.

Integrity reviews during 1975 resulted in the detection of fraudulent or erroneous refunds totaling \$720,000. In one case, the preparer sent fictitious tax returns to all ten service centers seeking refunds totaling \$270,000. Early detection of the scheme resulted in suppression of all of the fraudulent refunds prior to issuance. The integrity reviews were also a contributing factor in the referral to Internal Security of information indicating possible breaches of integrity by 249 employees and other individuals.

In addition to the prevention of revenue losses due to early detection of improper actions, the integrity reviews have a deterrent effect on those contemplating improper actions, and also identify operational problems for correction by management.

Internal Security Activities

Internal Security Division inspectors conduct background investigations of IRS job applicants and investigate complaints of criminal and non-criminal misconduct and irregularities concerning employees. They also investigate persons outside the IRS who attempt to bribe or otherwise corrupt Service employees or who threaten or assault employees.

The Division also investigates the unauthorized disclosure of Federal tax return information, disclosure or use of information by preparers of returns, and investigates charges against tax practitioners. In addition, the Division conducts special investigations and inquiries as required by the Commissioner and the Office of the Secretary of the Treasury.

During 1975, Internal Security Division inspectors arrested or were responsible for the indictment of 140 individuals, including 20 employees or former employees and 120 taxpayers, tax practitioners or others. A total of 76 defendants were convicted during the year including 57 defendants who pleaded guilty rather than go to trial. Forty-

one of these convictions were for bribery, 15 were for assault, and the remainder involved such other criminal charges as embezzlement, conspiracy to defraud the Government, obstruction of justice, subscribing to false returns and disclosure of confidential tax information.

Bribery Attempts

Last year, IRS employees continued to thwart those persons who challenged the integrity of the Service through attempted bribery. In 1975, 219 employees reported 238 possible bribery attempts, resulting in 61 arrests or indictments.

During the 14-year period that the IRS Inspection Service has had the responsibility for the bribery program, IRS employees have reported 1,647 bribery attempts. Approximately one of every four such attempts resulted in prosecution of the taxpayer; in the remainder there was insufficient evidence to warrant prosecution. Since 1961, bribery investigations have resulted in 442 arrests or indictments and 329 convictions or guilty pleas. At the end of 1975, 44 persons were awaiting trial on bribery charges.

The following cases illustrate bribery attempts during 1975:

Two Pennsylvania CPA's were each sentenced to three years probation and fined \$10,000 for attempting to pay an audit conferee \$15,000 to allow corporate travel and entertainment expenses of \$103,000 which had previously been disallowed.

A Florida hotel owner was indicted for attempting to pay a revenue agent \$1,050 to allow \$70,000 worth of claimed business expenses that could not be substantiated during an audit.

A major pornography peddler and massage parlor owner in New York and his go-between were indicted for attempted bribery after paying special agents \$14,000 to "fix" the pending tax case.

A \$5,000 bribe payment to a revenue agent in Pennsylvania in an effort to reduce an \$80,000 tax assessment resulted in the arrest and conviction of an auto parts manufacturer in California and a CPA in Pennsylvania. The payment was forwarded to the revenue agent through the Pennsylvania CPA from the manufacturer in California.

A New Jersey taxpayer and his CPA were arrested for bribery of a revenue agent and conspiracy after payment of \$1,300 for a no change audit result.

A dentist in California was indicted for paying a revenue agent \$1,000 in an effort to reduce tax deficiencies resulting from an audit of two tax returns.

Assaults and Threats on IRS Employees

Since March 1972, when it was assigned the responsibility for the Assault Program, the Internal Security Division has investigated 1,519 cases in this area. Prosecution was authorized in 137 cases and 57 of these resulted in convictions. During 1975, 619 investigations were initiated, and 15 persons were convicted. In instances where prosecution is not authorized, inspectors interview the alleged assailant, with the approval of the U.S. Attorney, to determine his or her full recollection of the incident. The alleged assailant is informed of the applicable Federal statutes and advised that repetitive acts could result in serious consequences, including prosecution.

The following cases illustrate examples of threat and assault cases this year:

An Oklahoma taxpayer was arrested for threatening two revenue officers who were attempting to seize his truck. The taxpayer brandished a pistol while threatening and ordering the revenue officers from his property.

An Indiana taxpayer was convicted for assaulting two revenue officers during a seizure of his automobile. The taxpayer struck both revenue officers and kicked one of the officers after knocking him to the ground.

A Georgia taxpayer was arrested after he pulled a knife on a revenue officer, shoved him in a room and physically assaulted him following a disagreement over delinquent taxes.

Prevention of Organized Crime Influence

The possible corruptive influence of organized crime upon the Service, always a matter of concern, has resulted in extensive investigations. In one case, extending over four years, ten individuals identified with organized crime were indicted on bribery

and conspiracy charges. Seven of them have been convicted, two were acquitted and the charges were dropped against one who pleaded guilty to other FBI charges. The last two convictions involved a gambling figure and an alleged kingpin in a crime family.

Other Criminal Prosecutions

Other criminal activities involving the Service which led to prosecutions as a result of Internal Security investigations this year were the following: An applicant for enrollment to practice before the IRS in Florida was arrested and convicted for submitting false statements on his application in an attempt to conceal a prior conviction stemming from failure to file an income tax return.

Two Michigan accountants were arrested for conspiracy and extortion in a scheme involving the impersonation of a revenue agent and an attempt to extort money from a taxpayer for ending a non-existent tax investigation.

A former Fresno Service Center employee and his brother were arrested and convicted after attempting to defraud the Government of \$14,000 through a refund scheme conspiracy.

Investigation of Employees

Employees who engage in improper behavior or unlawful actions constitute a very small percentage of the IRS work force. The vast majority of investigations relating to alleged acts of impropriety by Service personnel result in exoneration of the employees.

The Internal Security Division completed 18,265 investigations during the year. In addition, singular and multiple police record searches were conducted on 14,329 persons considered for temporary short-term appointments or for positions created for special economic and educational programs.

These searches or investigations resulted in the rejection of 195 job applicants and in disciplinary actions such as separations, suspensions, reprimands, warnings or demotion against 1,126 employees.

The chart on the next page shows the type of investigations completed during the past two years and disposition of those cases.

Investigative Teamwork

Breaches of integrity by individuals can be investigated jointly by Internal Audit and Internal Security with the assistance of the IRS Intelligence Division in some cases.

In one case, a supervisory employee was indicted on 19 counts of embezzlement in October 1974. The investigation disclosed that he misappropriated more than \$28,000 of taxpayers' payments and applied them to his own estimated tax account subsequently refunded to him. He pleaded guilty to the charges and received a prison term for his actions.

In another case, a former employee misappropriated nearly \$9,000 while working for the Internal Revenue Service. She was indicted for this action and subsequently pleaded guilty to the charges. Part of the sentence provided that she must make full restitution to the Government for the money that she embezzled.

Violations of tax laws discovered during internal audits and integrity investigations are referred to the IRS Intelligence Division for investigation if no employees are involved. During the year, there were 52 such referrals.

In each region, joint Internal Audit-Internal Security integrity developmental projects were established to probe identified high risk Service operations. For example, tests of selected seizure and sale transactions were made to determine if seized property had been disposed of in accordance with prescribed procedures. Also, tax adjustments resulting in large refunds were reviewed at service centers to verify the propriety of the adjusting actions. A third project was established to determine the propriety of the release of tax liens for delinquent accounts which had been outstanding for long periods.

Internal Security Division Investigations

Type of Investigations and Actions	1974	1975
Total Investigations	21,322	18,265
Personnel Investigations		
Character and Security	13,823	11,104
Conduct	1,367	1,063
Special Inquiries	2,711	2,561
Total Personnel Investigations	17,901	14,728
Other Type Investigations		
Assault	472	619
Disclosure	103	179
Applications to Practice Before IRS	1,207	1,491
Charges Against Attorneys, CPA's and Enrollees	74	75
Federal Tort Claims	144	134
Bribery	215	214
Investigations for Other Treasury Bureaus	1,206	825
Total Other Investigations	3,421	3,537
Actions by Management Officials on Personnel Investigations		
Total Actions	17,901	14,728
Separations ¹	331	256
Suspensions From Duty and Pay	115	74
Reprimands, Warnings and Demotions	1,033	796
Rejected for Employment	329	195
Non-Disciplinary Actions ²	16,093	13,407
Separations by Type of Offense		
Bribery, Extortion or Collusion	2	5
Embezzlement or Theft of Funds or Property	3	8
Failure of Employee to Pay Proper Tax	66	23
Falsification or Distortion of Reports, Records, etc.	117	123
Unauthorized Outside Activity	3	2
Failure to Discharge Duties Properly	10	12
Divulgence of Confidential Information	2	4
Acceptance of Fees and Gratuities	2	4
Refusal to Cooperate in Official Investigation	1	0
Personal and Other Misconduct	125	75

¹ Includes resignations, retirements or other separations while employees were under investigation or before administrative decision was made on disciplinary action where investigation disclosed derogatory information.

² Includes clearance and closed without action letters on conduct investigations.

Management and Administration

Cost Reduction and Management Improvement

With active support and involvement of executives and managers at all levels, the IRS in 1975 placed high priority on and carried out numerous projects aimed at reducing costs and improving the efficiency of operations. While it is not feasible to determine and report the savings from all cost reduction actions, the known results of several major cost reduction initiatives in overhead support operations indicate that savings of approximately \$20 million (some of a cost avoidance nature) will be realized.

For example, estimated savings in space and property utilization of over \$400,000 were reported in 1975, and savings of over \$3.0 million are projected for 1976 as a result of actions to reduce office space expansion; repair and refinish existing furniture when economically sound; use multiple occupancy work stations where more than one worker can efficiently occupy one work station; verify actual IRS-occupied square footage against measurement and billing records; and review assigned quality ratings and classifications of IRS space.

In the telecommunications area, an intensive cost reduction campaign resulted in better use of telecommunications facilities and innovative approaches toward providing effective telecommunications at lower cost. This campaign has reduced the cost of toll-free Taxpayer Service, Federal Telecommunications Systems (FTS), and local and long distance telephone calls in 1975 by \$1.1 million.

Several programs of effective mail management produced savings in 1975 of nearly \$3.9 million.

Records disposal during calendar year 1974 resulted in the release of space and equipment valued at \$2,047,000. A total of 126,953 cubic feet of records was destroyed in accordance with regular programs, and 265,580 cubic feet of records were retired to Federal Records Centers.

The Service's reports curtailment project, which in 1974 yielded an annual savings of \$2.4 million was carried into 1975 and produced additional savings of \$700,000 through the elimination of unessential reports and the modification of others. IRS employees Gary Hall, Roy Shiflett, and Joseph Tarantino received an Award for

Special Merit from the Association of Records Executives and Administrators in recognition of their achievements on this project.

Employee participation in cost reduction efforts was successfully promoted through the incentive awards program. During 1975, 932 employee suggestions were adopted, resulting in tangible benefits of \$710,200. In addition, 430 awards were granted for special achievements which saved \$535,900.

This total tangible savings of \$1,246,100 from suggestions and special achievements slightly exceeded incentive awards program savings reported in 1974, for which the Service received the Secretary's Award for Cost Reduction and Management Improvement.

Safety Programs

With a rate of 1.9 disabling employee injuries per million staff-hours worked in calendar year 1974—down from a rate of 2.0 in 1973—the Service continues to rank as one of the top Federal agencies in the area of health and safety.

Service personnel drove 127.6 million miles on official business in 1975 with only 812 accidents, for a low accident frequency rate of 6.4 accidents per million miles driven.

Executive Personnel

The IRS experienced an acute turnover of executive staff this year because of the large number of senior-level officials who retired in 1974 and the \$36,000 ceiling on executive salaries. However, the Service undertook to meet its obligation to fill executive positions by training 18 employees in an executive development class.

Other special efforts used by the IRS to train mid-level and top-level employees and minimize the amount of time senior officials are away from their posts of duty included: Development of "Technical Guidelines for Executives"—a ready desk reference providing current, concise and accurate interpretation and clarification of those complex portions of the Internal Revenue Code and Manual needed in the executive's day-to-day activities.

Communications via video tapes—a means, for the Commissioner and other headquarters officials to directly communicate their views, official policy, and new procedures on a person-to-person basis without the field executive having to travel to executive conferences.

Reduction in instructor time—reducing by almost 50 percent the time and number of executives needed to serve as instructors in improved mid-level training courses which accomplished in 2½ weeks what formerly took 4 weeks.

Commissioner Alexander made several visits to the North Atlantic Region during 1975. In the top photo, the Commissioner visits employees and managers at the newest Manhattan District post-of-duty at 55 West 125th Street in Harlem, New York City. In the bottom photo, taken at the

Brookhaven Service Center, Holtsville, N.Y., from left, Regional Commissioner Elliott Gray and Commissioner Alexander discuss operational matters with two audit division managers Ed Glister and Charles DeMarco.

Labor Management Activities

In early February, the IRS concluded a 2-year collective bargaining agreement with the National Treasury Employees Union (NTEU) covering 2,200 employees in the headquarters office. It provides for bilateral union-management decision-making in personnel policies and practices, such as promotions and performance evaluations.

At the close of 1975, the IRS and NTEU were involved in the process of negotiating a new multicenter agreement covering 29,000 employees in the Data Center, National Computer Center and in 9 of the 10 service centers. Overall, the National Office agreement, the multicenter agreement, and the multiregional and multidistrict agreements cover over 62,000 IRS employees.

The collective bargaining agreements concluded between the IRS and employee unions renewed the need for training of managers and supporting staff people on their supervisory responsibilities under the agreements.

Orientation sessions were held in all regions for first-line and middle managers, and three executive seminars on union relations were given to field and National Office officials. We also conducted training for personnel officers to assist them in advising managers on union relations matters.

Additional specialized courses in grievance handling and arbitration have been developed and will be used in Service-wide training next year.

Employment of the Handicapped

The IRS continued to increase its employment of the handicapped in all occupations. By the end of calendar year 1974, 1,629 handicapped persons were employed by the IRS. Of this number, 107 were blind individuals working as taxpayer service representatives in IRS districts and as tax examiners in the service centers.

Every year, the IRS focuses attention on the valuable contributions of IRS handicapped employees and their ability to perform top-level work by presenting an IRS Outstanding Handicapped Employee of the Year Award. This year, Charles E. Johnson, computer operator at the Andover Service Center, received the award.

Equal Employment Opportunity

The IRS continued to increase equal employment opportunity and to insure Upward Mobility opportunities for all employees. While total Service year-end employment increased by 13.6 percent between 1974 and 1975, minority employment during the same period increased by 19.6 percent, from 11,971 to 14,321. This included a 36 percent increase in employment of Spanish-speaking employees, from 1,609 to 2,188.

On December 14, 1974, the IRS officially recognized 1975 as "International Women's Year" and programs and activities were planned throughout the Service to focus attention on the potential and accomplishments of IRS women. During the year, Ms. Anita Alpern was appointed Assistant Commissioner (Planning and Research), making her the first career woman in the IRS and the Department of the Treasury to reach grade GS-18.

Commissioner Alexander confers with Jesse L. Paredes, of the Audit Division, shortly after appointing him as National Spanish Speaking Program Coordinator. Spanish Speaking coordinators in the National Office, regions, and district offices serve as a focal point for helping to prepare and implement affirmative action plans covering recruitment, job restructuring, training and career development which enhance opportunities for Spanish Speaking Americans within the Service.

The IRS formalized its Upward Mobility program in August, 1974, to place special emphasis on providing opportunities for employees in grades GS-1 through 7, or the equivalent, to increase their effective utilization in the tax administration area. Although the program was not fully implemented until late in the year, approximately 800 employees actively participated in training under the program.

Taxpayer Service Specialists

In recognition of increased emphasis upon providing quality assistance to taxpayers, the IRS developed the new taxpayer service specialist series. The program established taxpayer service occupations with expanded duties and responsibilities, higher-level qualification requirements, an improved grade structure and more comprehensive training. To enhance these occupations, the IRS developed new position descriptions, an amendment to the qualification standard, and incumbent selection and screening criteria.

Taxpayer Relations Training

During 1975, a special effort was also made to improve the effectiveness of taxpayer relations. Most new and certain incumbent employees in the collection activity who have direct dealings with the public attended taxpayer relations training which covered interpersonal communications, taxpayer rights and responsibilities, and how to resolve issues with taxpayers in a fair and helpful manner.

Revenue Agent Training

The IRS-designed revenue agent training program (units I, II, III and IV) was evaluated by the American Council on Education (ACE) in March and found to be of such high quality that ACE has recommended to colleges and universities the granting of six upper division credit hours to IRS employees who successfully complete the training program and who subsequently enroll in universities to pursue a masters degree in tax law.

The revenue agent training program has been revised to reduce the classroom portion of training from 14½ weeks to 12 weeks with

improved quality and effectiveness of instruction. Under the restructured training arrangement, a new revenue agent will be able to examine various tax returns with minimum supervision after 25 weeks of classroom and on-the-job training instead of 32 weeks. We estimate that about 1,200 agents will be trained next year with projected salary savings of \$1.2 million and per diem savings of \$360,000.

This year, another 31 experienced revenue agents were trained for computer audit specialist positions. By the end of 1975, 104 IRS employees were qualified to perform the complex auditing duties required by today's sophisticated computer-prepared tax returns.

Paraprofessional Positions

By the end of 1975, over 1,000 paraprofessional positions had been established and filled in the Audit, Collection, and Intelligence Divisions. These employees, in grades GS-4 through GS-7, perform work that would otherwise be done by professional and technical employees at grades GS-9 and above. This program has resulted in savings of over \$4.5 million dollars plus more effective use of the higher-level skills, knowledge and abilities of the professional and technical workforce.

Advisory Groups

Commissioner's Advisory Group

In January 1975, the Commissioner named 14 prominent accountants, attorneys, business executives, educators and public interest representatives to serve as his Advisory Group for 1975.

The group met with the Commissioner twice before the fiscal year ended to provide him and his staff with useful views and criticism of IRS operations so that the Service could do a better job of serving the public. Members of the group are selected on the basis of suggestions by professional and public interest organizations in the tax field, IRS officials around the country and other groups and individuals interested in sound tax administration. Members of the Commissioner's Advisory Group serve for one calendar year without compensation.

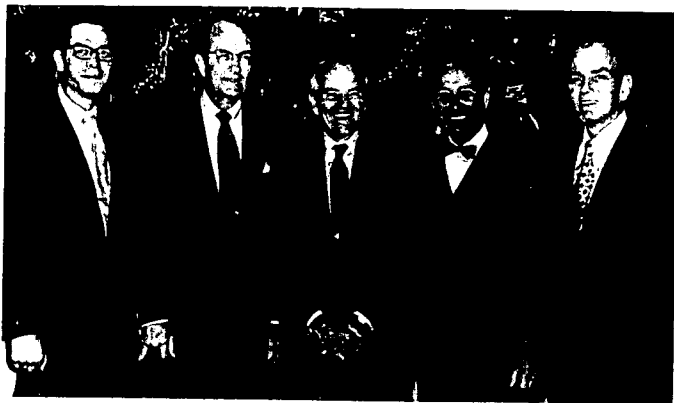

Art Advisory Panel

Since 1968, a 12-member panel of art experts including museum directors, scholars, and art dealers, has helped the Service determine the correct value of works of art donated to charity or included in taxable gifts or estates.

In its seven years of operation, the panel has reviewed estimates valued at more than \$145 million and has recommended valuation adjustments of over \$35 million. At the three meetings held during 1975, the panel reviewed works of art valued in tax returns at approximately \$27 million and recommended substantial adjustments in approximately 60 percent of the cases.

Small Business Advisory Committee

As a step towards recognizing and dealing with the particular tax problems of small businessmen, the Service announced the organization of a new Small Business Advisory Committee. The Committee held its first meeting in the fall of 1975.

An IRS retirement gathering in December 1974 brought five Internal Revenue Commissioners together, and this picture records the notable

event. (L to R) Sheldon S. Cohen, 1965-69; Johnnie M. Walters, 1971-73; Donald C. Alexander, 1973 to present; Mortimer M. Caplin, 1961-64; Randolph W. Thrower, 1969-71.

William Orton
New York
July 1, 1865/Oct. 31, 1865

Edward A. Rollins
New Hampshire
Nov. 1, 1865/Mar. 10, 1869

Columbus Delano
Ohio
Mar. 11, 1869/Oct. 31, 1870

Alfred Pleasonton
New York
Jan. 3, 1871/Aug. 8, 1871

John W. Douglass
Pennsylvania
Aug. 9, 1871/May 14, 1875

Daniel D. Pratt
Indiana
May 15, 1875/July 31, 1876

Green B. Raum
Illinois
Aug. 2, 1876/Apr. 30, 1883

Walter Evans
Kentucky
May 21, 1883/Mar. 19, 1885

Joseph S. Miller
West Virginia
March 20, 1885/Mar. 20, 1889

John W. Mason
West Virginia
Mar. 21, 1889/Apr. 18, 1893

Joseph S. Miller
West Virginia
Apr. 19, 1893/Nov. 26, 1896

W. St. John Forman
Illinois
Nov. 27, 1896/Dec. 31, 1897

Nathan B. Scott
West Virginia
Jan. 1, 1898/Feb. 28, 1899

George W. Wilson
Ohio
Mar. 1, 1899/Nov. 27, 1900

John W. Yerkes
Kentucky
Dec. 20, 1900/Apr. 30, 1907

John G. Capers
South Carolina
June 5, 1907/Aug. 31, 1909

Royal E. Cabell
Virginia
Sept. 1, 1909/Apr. 27, 1913

William H. Osborn
North Carolina
Apr. 28, 1913/Sept. 25, 1917

Daniel C. Roper
South Carolina
Sept. 26, 1917/Mar. 31, 1920

William M. Williams
Alabama
Apr. 1, 1920/Apr. 11, 1921

David H. Blair
North Carolina
May 27, 1921/May 31, 1929

Robert H. Lucas
Kentucky
June 1, 1929/Aug. 15, 1930

David Burnet
Ohio
Aug. 20, 1930/May 15, 1933

Guy T. Heleverling
Kansas
June 6, 1933/Oct. 8, 1943

Robert E. Hannegan
Missouri
Oct. 9, 1943/Jan. 22, 1944

Joseph D. Nunan, Jr.
New York
Mar. 1, 1944/June 30, 1947

George J. Schoeneman
Rhode Island
July 1, 1947/July 31, 1951

John B. Dunlap
Texas
Aug. 1, 1951/Nov. 18, 1952

T. Coleman Andrews
Virginia
Feb. 4, 1953/Oct. 31, 1955

Russell C. Harrington
Rhode Island
Dec. 5, 1955/Sept. 30, 1958

Dana Latham
California
Nov. 5, 1958/Jan. 20, 1961

Mortimer M. Caplin
Virginia
Feb. 7, 1961/July 10, 1964

Sheldon S. Cohen
Maryland
Jan. 25, 1965/Jan. 20, 1969

Randolph W. Thrower
Georgia
Apr. 1, 1969/June 22, 1971

Johnnie M. Walters
South Carolina
Aug. 6, 1971/Apr. 30, 1973

Donald C. Alexander
Ohio
May 25, 1973

Office of Commissioner of Internal
Revenue Created by Act of Congress, July
1, 1862

In addition, the following were Acting
Commissioners during periods of time
when there was no Commissioner holding
the office:

John W. Douglas, of Pennsylvania from
Nov. 1, 1870, to Jan. 2, 1871; Henry C.
Rogers, of Pennsylvania, from May 1 to
May 10, 1883, and from May 1 to June 4,
1907; John J. Knox, of Minnesota from
May 11 to May 20, 1883; Robert Williams,
Jr., of Ohio, from Nov. 28 to Dec. 19, 1900;

Footnotes for Tables 1-4

*Less than \$500.

r Revised.

1. The receipts in the various States do not indicate the Federal tax burden of each since, in many instances, taxes are collected in one State from residents of another State. For example, withholding taxes reported by employers located near State lines may include substantial amounts withheld from salaries of employees who reside in neighboring States.

2. Includes taxes on unrelated business income of exempt organizations.

3. Collections of individual income tax not withheld include old-age, survivors, disability, and hospital insurance taxes on self-employment income. Similarly, the collections of individual income tax withheld are reported in combined amounts with old-age, survivors, disability, and hospital insurance taxes on salaries and wages. Estimated separate national totals for individual income tax and for old-age, survivors, disability, and hospital insurance taxes are shown in the text table on p. and are used in obtaining national totals for individual income taxes and employment taxes in table 4.

4. Self-employment tax and taxes imposed by the Federal Insurance Contributions Act are applicable with respect to Guam and American Samoa. Amounts of such taxes collected in Guam and American Samoa are combined with similar taxes reported for Office of International Operations-Other.

5. Beginning with fiscal year 1957, the United States total is adjusted to exclude withheld individual income taxes transferred to the Government of Guam in accordance with the provisions of Public Law 850, approved Aug. 1, 1950 (64 Stat. 392). This adjustment amounted to \$16.0 million for 1975.

6. Tax payments made to banks, under the Federal tax deposit system, are included in the internal revenue collections for the period in which the Federal tax deposit is purchased. However, such payments are not classified by internal revenue districts (nor by tax subclasses to which excise tax payments relate) until the Federal tax deposit payment is applied to the taxpayer's liability from tax returns filed.

7. Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess payments under the Federal Insurance Contributions Act (FICA).

8. Designations by taxpayers of a portion of their taxes to the Presidential Election Campaign Fund are not collections, as such, because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and, therefore, have no effect on district and regional collection data.

9. Amounts of internal revenue taxes collected on Puerto Rican products transported to the United States or consumed on the island (less rebates, drawbacks, and expenses) are covered into the Treasury of Puerto Rico under provisions of secs. 7652(a)(3) and 5314(a)(4) of the Internal Revenue Code of 1954. The gross amounts are included in overall collection results (Tables 1 through 4).

10. Refer to Table 3 for components.

11. Includes stamp taxes on documents, other instruments, and playing cards amounting to \$113 thousand for fiscal 1975.

12. Corporation income tax rates: Effective January 1, 1965, first \$25,000 of net income normal tax rate of 22 percent; net income in excess of \$25,000 combined normal and surtax of 48 percent. Normal tax and surtax also apply to net income derived by certain exempt organizations from unrelated trade or business. Effective January 1, 1968, a 10 percent per annum surcharge was added to the tax. (Public Law 90-364). The 10 percent per annum surcharge was extended to December 31, 1969, by Public Law 91-53, extended to June 30, 1970 by Public Law 91-172 at a 5 percent annual rate, and then discontinued.

13. Rates of tax are as follows: Individual income tax: Effective January 1, 1965, graduated rates from 14 percent to 70 percent of taxable income. Includes old-age, survivors, disability, and hospital insurance taxes on self-employment income. The 10 percent per annum surcharge added by Public Law 90-364, effective April 1, 1968, for individuals, was extended to December 31, 1969, at the same annual rate (Public Law 91-53), extended to June 30, 1970 (Public Law 91-172) at a 5 percent annual rate, and then discontinued.

14. Rates of tax are as follows: Income tax graduated withholding on wages in excess of exemptions: Public Law 89-368, effective July 1, 1967, 14 to 33 percent; Public Law 91-172, effective January 1, 1970, 14 to 25 percent; 14 to 36 percent effective January 16, 1972, under Public Law 92-178, and 16 to 36 percent, effective April 30, 1975, under Public Law 94-12. Old-age, survivors, disability and hospital insurance taxes on salaries and wages up to \$13,200 were subjected to a combined FICA tax rate of 11.7 percent for calendar years 1974 and 1975. Effective January 1, 1975, the base was raised to \$14,100.

15. Consists of regular railroad retirement combined tax rate of 21.2 percent for calendar years 1974 and 1975. Tax applies to employers (15.35%) and employees (5.85%) and is imposed on taxable portion of wages limited to first \$1,100 of monthly taxable compensation for 1974 and \$1,175 for 1975. Further includes railroad employee representatives' tax of 21.2 percent for calendar years 1974 and 1975 on taxable portion of compensation received. In addition, a supplemental tax levied quarterly by the Railroad Retirement Board is imposed on employers and employee representatives based on man-hours worked.

16. Issues and transfers of stocks and bonds, repealed, effective January 1, 1966. Deeds of conveyances; \$100 to \$500, 55 cents; each additional \$500 or fraction thereof, 55 cents; repealed effective January 1, 1968.

17. Cutting oil, automobile parts and accessories (except truck parts), repealed effective January 1, 1966, (Public Law 89-44).

18. Taxes on passenger automobiles and light trucks repealed December 11, 1971, by the Revenue Act of 1971.

19. Repealed, effective June 22, 1965 (Public Law 89-44).

20. Repealed, effective noon, December 31, 1965 (Public Law 89-44).

21. Repealed, effective January 1, 1966 (Public Law 89-44).

22. Rate was reduced from 10 percent to 9 percent on January 1, 1973, to 8 percent on January 1, 1974, and to 7 percent January 1, 1975 (Public Law 91-614).

23. Narcotics, 1 cent per ounce; narcotics order blanks, \$1 per hundred. Marijuana, \$1 per ounce; Marijuana order blanks, 2 cents each. Amounts shown also include occupational taxes levied on manufacturers, dealers, and practitioners. Repealed, effective May 1, 1971 (Public Law 91-513).

24. Repealed, effective July 1, 1965 (Public Law 89-44).

25. Tax increased from \$50 to \$500, effective December 1, 1974 (Public Law 93-499).

26. Rate reduced from 10 percent to 2 percent, effective December 1, 1974 (Public Law 93-499).

27. Adulterated butter, 10 cents per pound. Process or renovated butter, 1/4 cent per pound. Domestic filled cheese, 1 cent per pound; imported filled cheese, 8 cents per pound. Imported adulterated butter and oleo-margarine, 15 cents per pound. Occupational taxes are levied on manufacturers or dealers in these products and are included in the amounts shown. Filled cheese taxes repealed effective October 26, 1974 (Public Law 93-490).

28. Transfers of machine guns, short-barreled firearms, silencers, etc., \$200 each; certain guns with combination shotguns and rifle barrels, and other special types of firearms, \$5 each. Occupational taxes are levied on manufacturers, importers, or dealers in firearms and are included in the amounts shown.

29. By Executive Orders, rate reduced from 11.25 percent to 3.75 percent on January 1, 1974, and to zero on January 29, 1974. Legislative authority for the IET expired on June 30, 1974.

30. Negative figures (excluding unapplied collections) stem primarily from floor stock credits taken on certain taxes repealed by the Excise Tax Reduction Act of 1965.

Table 5.—Amount of internal revenue refunds including interest (excluding tax rebates)
(In thousands of dollars)

Table 11.—Appellate Division receipts and dispositions of cases not before the Tax Court (nondocketed cases)

A. Progress of work		F.Y. 1975		
Status	Number of cases	Amount stated in revenue agent's report (thousand dollars)		
		Deficiency and penalty (2)	Overassessment (3)	
Pending July 1	22,551	4,068,121	199,396	
Received	16,629	1,406,306	64,326	
Disposed of, total	21,492	1,580,290	72,118	
By agreement	16,080	1,155,305	70,501	
Unagreed: (Overassessments, claims, excise, employment, and offer in compromise rejections)	1,979	42,871	1,527	
By taxpayer default on statutory notice	751	47,160	0	
By petition to the Tax Court—transferred to docketed status	2,682	314,954	0	
Pending June 30	19,688	3,914,139	191,604	

B. Results obtained in dispositions

Method	Number of cases	Appellate determination (thousand dollars)		
		Deficiency and penalty (2)	Overassessment (3)	
Disposed of, total	21,492	851,524	90,669	
By agreement	16,080	472,956	87,477	
Unagreed: (Overassessments, claims, excise, employment, and offer in compromise rejections)	1,979	41,267	3,412	
By taxpayer default on statutory notice	751	43,009	0	
By petition to the Tax Court—transferred to docketed status	2,682	294,462	0	

Table 12.—Appellate Division receipt and disposition of income, estate and gift tax cases petitioned to the Tax Court (docketed cases)

A. Progress of work		F.Y. 1975		
Status	Number of cases	Amount stated in statutory notice (thousand dollars)		
		Deficiency and penalty (2)	Overassessment (3)	
Pending July 1	12,588	2,005,295	not applicable	
Received, total	11,206	667,750		
Petitions filed in response to District Directors' statutory notices	6,729	369,753		
Appellate Division's statutory notices ¹	2,477	297,997		
Disposed of, total	8,535	565,768		
By stipulated agreement	6,426	379,753	not applicable	
By dismissal by the Tax Court or taxpayer default	1,142	12,855		
Tried before the Tax Court on the merits	967	173,158		
Pending June 30	15,259	2,108,279		

¹ Difference from table 11, transferred to docketed status is caused by excluding district directors' statutory notices considered by Appellate in 90-day status.

B. Results obtained in dispositions

Method	Number of cases	Appellate determination (thousand dollars)		
		Deficiency and penalty (2)	Overassessment (3)	
Disposed of, total	8,535	296,272		
By stipulated agreement	6,426	112,282	not applicable	
By dismissal by the Tax Court or taxpayer default	1,142	11,455		
Tried before the Tax Court on the merits ¹	967	174,535		

¹ Represents amounts petitioned.

Table 13.—Appellate Division processing of all cases for 1974–1975 (income, estate, gift, excise, employment, and offers-in-compromise)

Status	Number of cases	
	1974	1975
Pending July 1	34,788	35,139
Received	30,686	29,835
Disposed of, total	29,722	30,627
By agreement	22,300	22,506
Unagreed: (Overassessments, claims, excise, employment, and offer-in-compromise rejections)	1,743	1,979
By taxpayer default on statutory notice or dismissal by Tax Court	1,803	1,893
By petition to the Tax Court	2,879	2,682
Tried in the Tax Court	997	967
Pending June 30	35,112	34,947

Table 14.—District conference activity

	F.Y. 1975		
	Field Audit	Office Audit	Total
Cases pending July 1	6,688	6,119	12,807
Cases received	19,827	26,977	45,804
Conference completed	17,269	26,121	43,390
Number agreed	11,411	21,028	32,439
Agreed as a percent of total	66.1	60.5	74.6
Cases pending June 30	8,246	6,875	15,121

Table 15.—Overassessments of tax exclusive of claims for refund

	Number		Amount Recommended (thousand dollars)	
	1974	1975	1974	1975
Total	103,473	122,399	\$364,454	\$302,796
Individual and Fiduciary	73,507	97,586	52,015	71,917
Corporation	16,677	11,464	266,708	165,823
Estate	5,892	5,902	30,580	34,406

Employment	1,870	2,637	1,609	2,248
Exempt Organizations	708	— ¹	962	— ¹

¹ Exempt organizations activity transferred to new office of employee plans and exempt organizations in December 1974.

Table 16.—Workflow in the Internal Revenue Service and the courts, fiscal years 1974 and 1975

Returns	1974	1975
RETURNS		
Tax returns filed, total	121,914,073	125,117,100
Individual income	83,028,941	85,519,719
Corporation income	1,981,300	2,132,847
Estate and gift	464,193	476,012
Employment	24,794,221	24,756,630
Excise	1,342,220	1,430,386
Other income	10,303,118	10,802,506
Income, Estate and Gift Taxes		
Number of returns examined by Audit Division	1,960,375	2,171,923
Returns with adjustments proposed by Audit Division	1,422,190	1,667,492
Disposed of by Audit Division:		
Agreed, paid or defaulted	1,378,092	1,625,147
Transferred to Appellate	32,600	28,624
Other	11,498	13,721
Number of returns examined by Exempt Organization Division	20,487	22,168
Returns with adjustments proposed by Exempt Organization Division	4,731	6,247
Number of returns examined by Employee Plans Division	37,671	65,562
Returns with adjustments proposed by Employee Plans Division	4,599	6,225
Civil Cases		
Total received in appellate division	18,569	15,841
Disposed of by appellate divisions: Agreed, paid or defaulted	15,800	15,924
Courts of original jurisdiction:		
Tax court:		
Total petitioned to Tax Court	8,799	11,206
Dismissed	911	1,143
Settled by stipulation	6,493	6,436
Settled by Tax Court decision	1,100	989
Decided by Tax Court, but appealed	257	255
District courts and Court of Claims:		
Total filed in district courts and Court of Claims	1,133	1,018
Settled in district courts and Court of Claims	552	606
Decided by district courts and Court of Claims	471	414
Courts of Appeals:		
Settled by courts of appeals decision	363	356
Favorable to Government	250	250
Favorable to taxpayers	96	52
Modified	17	54
Decided by courts of appeals but reviewed by Supreme Court	4	—
Supreme Court: Settled by Supreme Court decision	4	—
Fraud Cases		
Received for investigation in intelligence divisions	8,078	9,288
Disposed of by intelligence division:		
Prosecution recommended	2,554	2,700
Prosecution not recommended	4,781	5,971
Disposed of by Office of Chief Counsel:		
Prosecution not warranted, including cases declined by the Department of Justice	272	381
Prosecutions	1,423	1,397

Table 17.—Amounts of revenue involved at each level of the tax system, fiscal years 1974 and 1975

	(million dollars)	
	1974	1975
Item		
Internal revenue collections, total	268,852	293,823
Individual income taxes, total	142,004	156,399
Withholding	112,092	122,103
Other	30,812	34,296
Corporation income taxes	41,744	45,747
Estate and gift taxes	5,101	4,688
Employment taxes	62,094	70,141
Excise taxes	17,110	16,846
Income, Estate, and Gift Taxes		
Civil Cases		
Additional tax and penalties disposed of in audit divisions by agreement, payment or default	2,253	2,576
Additional tax and penalties disposed of in exempt organization division	5	33
Additional tax and penalties disposed of in employee plans division	1	1
Additional tax and penalties in cases disposed of in appellate divisions by agreement, payment or default	500	516
Tax and penalties determined by settlement in Tax Court	123	114
Tax and penalties determined by Tax Court decisions:		
Dismissed	8	11
Decisions on merits ¹	22	21
Tax and penalties determined in cases decided by the Supreme Court and Courts of Appeals	10	6
Amount in dispute but not refunded to taxpayers as a result of final action on refund suits	77	75
Fraud Cases		
Deficiencies and penalties in cases disposed of in intelligence divisions:		
Prosecution recommended	374	235
Prosecution not warranted and cases declined by Department of Justice	9	7

¹ Additional tax proposed by employee plans division are included in the additional tax proposed by audit and exempt organization divisions.
² Reflects amount determined in all Tax Court decisions, including those subsequently appealed.

Table 18.—Determination letters issued on employee benefit plans, fiscal year 1975

Item	Profit-sharing and stock bonus plans	Pension or annuity plans	Total
Determination letters issued with respect to—			
1. Initial qualification:			
a. Plans approved	22,038	25,568	47,606
b. Plans disapproved	139	205	344
c. Number of participating employees in plans requesting initial qualification	254,704	1,001,913	1,256,617
2. Termination	2,326	3,229	5,555
3. Amendments	4,812	12,305	17,117
4. Investments	117	77	194
Cases closed without issuance of determination letter and other disposals	2,425	3,783	6,208

Table 19.—1974 Individual tax rebates
as provided for in the 1975 Tax Reduction Act
(Amounts in thousands of dollars)

Internal revenue regions, districts, States and other areas. (States represented by single districts indicated in parentheses; total for other States shown at bottom of table)	APPLICATION OF REBATE CREDITS ¹

¹ Number of applications exceeds number of credits because one credit may have a dual application, i.e., partially refunded and partially applied to 1974 Balance Due.
² The Rebate Credits refunded include 216,795 refunds amounting to \$21,417,229.27 scheduled in the last week of June 1975 and issued in the first week of July 1975. Data reflects refunds processed by National Computer Center and scheduled for issuance by Regional Distributing Centers.
³ Rebate Credit generated but temporarily unapplied pending resolution of taxpayer's account.
⁴ The numbers and amounts in columns 9 and 10 for the Office of International Operations and the Philadelphia District are based on an allocation of the total for those two offices. Returns for the Office of International Operations are processed by the Philadelphia Service Center.

Table 20.—Tax withheld from payments to foreign persons of treaty and nontreaty countries—calendar year 1973
(Thousand dollars)

7. Field Printing						
	611,921	631,988		5,555	8,207	
	295,989	373,450		2,072	2,775	
8. All Printing to Support the Economic Stabilization Program ⁵						
	4,560			204		
Grand Total	3,254,425	3,639,812		30,122	43,313	

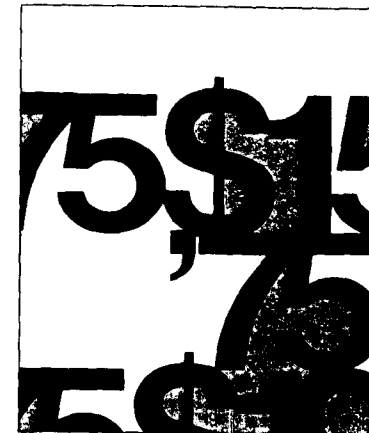

¹ Due to the volume of printing requirements, solicitations for the major tax packages are issued in each year in the spring. Expenditures may, therefore, overlap two fiscal years.

² Additional costs will be incurred for the 1975 tax packages in FY-76.

³ FY-73 costs may be only that amount expended during FY-73 for tax year 1973 packages.

⁴ Economic Stabilization Program was no longer in effect in FY-75.
